Management's Discussion and Analysis

Department of Defense Medicare-Eligible Retiree Health Care Fund For the Year Ended September 30, 2019

The Department of Defense (DoD) Medicare-Eligible Retiree Health Care Fund's (the "Fund" or MERHCF) discussion and analysis provides an overview of MERHCF's financial activities for the fiscal year (FY) ended September 30, 2019. Since this information is designed to focus on the current year's activities, resulting changes, and currently known facts, it should be read in conjunction with the MERHCF's principal statements and notes (beginning on page 21).

1. REPORTING ENTITY, MISSION AND MANAGEMENT STRUCTURE

Reporting Entity and Mission. The reporting entity is MERHCF. The "mission" of the MERHCF, administered by the Secretary of the Treasury, is to accumulate funds in order to finance, on an actuarially sound basis, liabilities of DoD under uniformed services health care programs for specific Medicare-eligible beneficiaries, as designated by Sections 1111 through 1117 of Title 10, U. S. Code. The FY 2001 National Defense Authorization Act (NDAA) directed the establishment of the MERHCF to pay for Medicare-eligible retiree health care beginning on October 1, 2002. Prior to this date, care for Medicare-eligible beneficiaries was financed through annual Congressional appropriations for the Military Health System (MHS) (including the Defense Health Program [DHP] and Military Pay appropriations). The Fund covers Medicare-eligible beneficiaries, regardless of age. In the context of the Fund, hereafter the term "Medicare-eligible beneficiaries" is used to refer to Medicare-eligible beneficiaries who are related to retirees (i.e., retirees themselves, dependents of retirees, and survivors).

Board of Actuaries. The 2001 NDAA also established an independent three-member DoD Medicare-Eligible Retiree Health Care Board of Actuaries (MERHCF Board) appointed by the Secretary of Defense. The MERHCF Board approves the methods and assumptions used to calculate the per capita normal cost rates and the U.S. Treasury contribution. Details about the methods and assumptions used in the calculation of the 2018 actuarial liability are reported in the MERHCF Board of Actuaries minutes of the August 2, 2019 meeting and are available upon request. The MERHCF Board is required to review the actuarial status of the Fund, to report annually to the Secretary of Defense, and to report to the President and the Congress on the status of the Fund at least every four years. The DoD Office of the Actuary (OACT), under the Defense Human Resources Activity, provides all technical and administrative support to the Board and is essential in providing the actuarial assessments regarding contributions to the Fund and calculations of the actuarial liability as well as impacts of either current or proposed future retiree program changes. The OACT operates in accordance with the provisions of Sections 1111 through 1117 of Title 10, U.S. Code and DoD policy established in the DoD Financial Management Regulation (FMR), Volume 12, Chapter 16, dated October 2015, with revised publication scheduled for October 2019.

Defense Health Agency (DHA) Establishment. A change in reporting entity for FY 2014 was made effective October 1, 2013 to establish the DHA and disestablish the TRICARE Management Activity (TMA). The DoD Directive 5136.13, "Defense Health Agency," dated September 30,

2013, transfers appropriate TMA functions to the DHA. Any reference in law, rule, regulation, or issuance to TMA will be deemed to be a reference to DHA, unless otherwise specified by the Secretary of Defense. There is no financial reporting change to the MERHCF because of the DHA establishment. Within DoD the Office of the Under Secretary of Defense for Personnel and Readiness through the Office of the Assistant Secretary of Defense for Health Affairs (OASD (HA)), DHA has as one of its missions the operational oversight of the MHS, including management of the Fund. DHA management responsibilities include accounting for, documenting, and projecting annual budget distribution requirements (purchased care claims, demands, and military treatment facilities (MTFs) prospective payments for anticipated care provided in the direct care system), oversight of claims processors, monitoring/management of the Improper Payments Information Act (IPIA) of 2002, and preparation of financial statements and footnotes.

Defense Finance and Accounting Service (DFAS). The DFAS Trust Fund Accounting and Reporting Division (TFAR) provides accounting and investment services for the Fund. The Investment Fund Manager is responsible for investing cash balances of MERHCF not required to meet current expenditures. Investments are limited to market-based U.S. Government Special Securities issued by the U. S. Treasury and are made in accordance with the provisions of Sections 1111 to 1117 of Title 10, U.S. Code.

TRICARE Plans and Programs for Medicare-Eligible Beneficiaries

TRICARE for Life (TFL). The TFL was created as “wrap-around” coverage to Medicare-eligible military retirees by Section 712 of the *Floyd D. Spence National Defense Authorization Act* for FY2001 (P.L. 106-398). TFL functions as a second payer to Medicare, paying out-of-pocket costs for medical services covered under Medicare for beneficiaries who are entitled to Medicare Part A based on age, disability, or end-stage renal disease. TFL covers Medicare-eligible retirees, including retired guardsmen, reservists, and Medicare-eligible family members and survivors. A beneficiary must be eligible for Medicare Part A and enrolled in Medicare Part B. The Medicare-eligible retirees and family members of the non-DoD Uniformed Services (Coast Guard, Public Health Service (PHS), and National Oceanic and Atmospheric Administration) are also eligible for these benefits. TFL serves as the final payer for Medicare covered benefits, and first payer for TRICARE benefits that are not covered in the Medicare or other health insurance (OHI) programs.

TRICARE Pharmacy Program: The TRICARE Pharmacy Program authorizes eligible beneficiaries to obtain low-cost prescription medications from the TRICARE Mail Order Pharmacy (TMOP) and TRICARE civilian pharmacies (network and non-network). Beneficiaries may also continue to use military hospital and clinic pharmacies at no charge.

TRICARE Plus. TRICARE Plus is an MTF primary care enrollment program that is offered at selected local MTFs. All beneficiaries eligible for care in MTFs (except those enrolled in TRICARE Prime, a civilian Health Maintenance Office, or Medicare can seek enrollment for primary care at MTFs where enrollment capacity exists. Non-enrollment in TRICARE Plus does not affect TFL benefits or other existing programs.

Designated Provider Program (DPP) formerly Uniformed Services Family Health Plan. (USFHP). Finally, DoD beneficiaries, including Medicare-eligible beneficiaries, in specific locations where DPP, formerly the USFHP, facilities are available, may enroll in capitation rate plans. These plans

include inpatient and outpatient services and a pharmacy benefit. The capitation rate is paid by DoD. Beneficiaries who choose enrollment in these plans are ineligible for care in MTFs as well as for benefits under the TFL (or other TRICARE plans) and Pharmacy programs. Prior to August 20, 2012, USFHP enrollees were not required to participate in Medicare. Beginning October 2012, a military retiree (or eligible family member) who becomes eligible for Medicare due to age may not enroll or stay enrolled in the USFHP, unless the military retiree (or eligible family member) was enrolled in the plan prior to September 30, 2012.

Health Care Purchased from Civilian Providers

Purchased Care. In accordance with DoD 7000.14-R, *Financial Management Regulation*, Volume 12, Chapter 16, the DHA Contract Resource Management (CRM) reports daily obligations to the Fund for health care purchased from civilian providers or “purchased care”. Daily claims are validated by the voucher edit procedures required by the TRICARE/Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) *Automated Data Processing Manual* 6010.50-M, dated May 1999, to ensure that only costs attributable to Medicare-eligible beneficiaries are included in payments drawn from the Fund.

DHA uses a TRICARE Dual Eligible Fiscal Intermediary Contract (TDEFIC) awarded to Wisconsin Physician Services for purposes of processing all claims supported by the Fund, regardless of the geographic region in which care was received. Dual eligibility refers to health care users who are both Uniformed Services beneficiaries (retired, dependents of retired, and survivors) and Medicare-eligible beneficiaries. Having a single fiscal intermediary to process all dual-eligible claims ensures greater confidence in uniformity and consistency of claims adjudication.

Purchased Care through DPP. DHA reports obligations to the Fund for the estimated DPP obligation amount based on the contract-specific capitation rates for Medicare-eligible beneficiaries enrolled for each DPP hospital contract option period twice per year, upon the commitment of funds and prior to the start of the option period. Each DPP hospital's reported enrollment is used to reconcile contracted enrollment estimates for Medicare-eligible beneficiaries. At the end of each option period, total charges are reconciled against the estimate and any over and/or under charged amounts are applied to the estimated requirement for the following option period.

For more detailed information about DHA CRM purchased care processes and controls, please see the “DoD DHA CRM Management's Discussion and Analysis for the Years Ended September 30, 2019 and 2018.”

Computation of Incurred Claims Reserve

The actuarial determination of the Fund's liability for Incurred But Not Reported (IBNR) claims for purchased care relies on data files provided by DHA, through the MHS Data Repository (MDR), to the OACT. The IBNR is determined quarterly, using claims triangles that represent paid claims in the month they were incurred. For pharmacy IBNR, OACT relies on a paid claims report that summarizes amount paid by date incurred. Standard actuarial methods are used to compute the IBNR, including the development of month-to-month completion factors, IBNR smoothing techniques, as well as analysis and research of patterns, trends, and anomalies. Separate

MERHCF accounting reports with line item detail are also used to estimate the outstanding administration costs associated with IBNR claims.

Health Care Provided in MTFs

Direct Care. The Fund develops prospective payment amounts for health care estimated to be provided directly in MTFs (Direct Care) to Medicare-eligible beneficiaries based on DoD policy established in the FMR, Volume 12, Chapter 16, October 2015, with revised publication scheduled for October 2019. The prospective payment amounts are calculated for each MTF and include both Military Personnel (MILPERS) and DHP Operations and Maintenance (O&M) costs.

The prospective payment amounts are based on costs reported by the MTF's Medical Expense and Performance Reporting System (MEPRS) and patient encounter data for the most recent FY for which data is complete at the time the calculations are prepared. DHA develops, in coordination with the Military Departments and Office of the Under Secretary of Defense (Comptroller) (OUSD(C)), MTF-specific rates in accordance with the FMR, Volume 12, Chapter 16. MEPRS cost data is recorded separately for MILPERS and O&M components per clinical workload. These amounts are inflated to the year of execution using budget data provided by the Military Services, and standard Office of Management and Budget (OMB) Consumer Price Index-Urban Medical inflation rates listed in the President's Budget applicable to those years. MEPRS data is recorded and maintained by the Military Services in accordance with DoD 6010.13, Vol 1, *Medical Expense and Performance Reporting System for Fixed Military Medical and Dental Treatment Facilities, Business Rules*, dated 27 September 2018, and DoD 6010.13, Vol 2, *Medical Expense and Performance Reporting System for Fixed Military Medical and Dental Treatment Facilities, Uniform Chart of Accounts*, dated 27 September 2018.

OUSD(C) transfers MERHCF funds quarterly for the MTF prospective payments (based on the DHA-calculated annual total direct care program amounts) to the Military Services for MILPERS costs and to DHA for DHP O&M costs. DHA, in turn, distributes DHP O&M funds to the Service Medical Activities (SMA) of the Army, Navy, Air Force, and National Capital Region – Medical Directorate for execution. OUSD(C) includes financial authority in the DHP expense operating budget to finance the annual financial plan requirement of the prospective payment. When the year of execution is completed and the associated workload and cost data is available, DHA conducts an execution review in coordination with OUSD(C) and the Military Services. A comparison of prospective payment amounts to actual workload and costs is accomplished in accordance with the FMR.

The prospective O&M payment for MTF-provided care to Medicare-eligible beneficiaries was \$1.8 billion in FY 2019 and \$1.7 billion in FY 2018. While the unit costs of inpatient and outpatient services have risen slightly, utilization of inpatient services has continued to decrease while costs related to pharmacy non-ingredient O&M have increased. The prospective payment for MILPERS expenditure for care provided in the MTFs to Medicare-eligible beneficiaries was \$0.5 billion in FYs 2019 and 2018.

2. PERFORMANCE MEASURES

The mission of the Fund is to finance, on an actuarially sound basis, liabilities of the DoD and the uniformed services health care programs for specific Medicare-eligible beneficiaries. There are many ways to measure the funding progress of actuarially determined accrual funds. The ratio of assets in the Fund to the actuarial liability is a commonly used fund ratio. As of September 30, 2019, the Fund had net assets available to pay benefits of \$251.1 billion and an actuarial liability of \$573.2 billion (See Note 10 – Military Retirement and Other Employment Benefits); the funding ratio was 43.8%. As of September 30, 2018, the Fund had net assets available to pay benefits of \$237.6 billion and an actuarial liability of \$535.3 billion; the funding ratio was 44.4%. Notwithstanding the effect of other actuarial gains and losses that will occur over time, this ratio is expected to reach 100% once the initial unfunded liability is fully amortized in accordance with a schedule set by the DoD Board of Actuaries. The 38-year amortization period for the initial unfunded liability is scheduled to end in FY 2040.

The table and variance analysis in the following section presents certain comparative financial statement information for the MERHCF.

3. FINANCIAL STATEMENT ANALYSIS

Comparative Financial Data

Medicare-Eligible Retiree Health Care Fund				
Analysis of Financial Statements				
for the years ended September 30, 2019 and 2018				
(\$ In Thousands)				
Balance Sheets	2019	2018	Difference Increase/ (Decrease)	% Change
Fund Balance with Treasury	\$62,575	\$94,388	(\$31,813)	(34%)
Investments, Intragovernmental Securities	\$278,459,142	\$266,269,629	\$12,189,513	5%
Liabilities Not Covered by Budgetary Resources ¹	\$322,081,522	\$297,671,422	\$24,410,100	8%
Accounts Payable (Nonfederal)	\$166,484	\$122,857	\$43,627	36%
Military Retirement and Other Federal Employment Benefits	\$573,847,418	\$535,949,009	\$37,898,409	7%
Statements of Net Cost				
Net Cost of Operations	\$25,778,212	(\$7,178,194)	\$32,956,406	459%
Statements of Budgetary Resources				
Agency Outlays, Net	(\$5,764,925)	(\$5,961,089)	\$196,164	3%
Net Amount of Budgetary Resources Obligated for Undelivered Orders	\$119,845	\$110,056	\$9,789	9%

¹ included as a component of the line titled "Military Retirement and Other Federal Employment Benefits"

Comparative Financial Data Variance Analysis

BALANCE SHEETS

Fund Balance with Treasury (Note 2)

Fund Balance with Treasury (FBWT) decreased \$31.8 million (34%) due to a \$88 million decrease in the September end of month holdback estimated to cover final month-end disbursements and a decrease of \$56.2 million in the final month-end disbursements made by the Defense Health Agency (DHA) for September 2019 versus September 2018. Each month, a holdback amount is estimated based on the current month to date DHA disbursements versus the average monthly disbursement over the past 12 months.

Investments - Intragovernmental Securities (Note 3)

Total Intragovernmental Securities, Net Investments increased \$12.2 billion (5%). This increase is the result of investing annual contributions from the U.S. Treasury and the Uniformed Services (Army, Navy, Air Force, Marine Corps, U.S. Public Health Service, National Oceanic and Atmospheric Administration, and U.S. Coast Guard), net of benefits paid. Investment of these funds has a cumulative effect with an expectation invested balances will continue growing to cover future benefits. The amounts not required for current year benefit payments were reinvested. The MERHCF purchased \$16.5 billion in long-term securities in FY 2019.

Liabilities Not Covered by Budgetary Resources (Note 6)

Total Liabilities Not Covered by Budgetary Resources increased \$24.4 billion (8%). This change is due to an increase of \$37.9 billion in Military Retirement and Other Federal Employment Benefits Liability, offset by an increase of \$13.5 billion in net receipts from contributions, interest income, and outlays that are available to pay future benefits. See Note 10, Military Retirement and Other Federal Employment Benefits, for additional information about these changes.

Accounts Payable (Nonfederal) (Note 7)

Accounts Payable, Nonfederal increased \$43.6 million (36%). This increase is a result of non-federal payable rise in retail pharmacy prescriptions which in turn caused a decrease in Federal Mail Order replenishment costs.

Military Retirement and Other Federal Employment Benefits (Note 10)

The present value of Military Retirement and Other Federal Employment Benefits Liability increased \$37.9 billion (7%). This resulted primarily from the net effect of an increase of \$19.6 billion due to expected increases (interest and normal costs less benefit outlays), an increase of \$27.5 billion due to changes in key assumptions, a decrease of \$9.3 billion decrease due to actual experience being different from what was assumed (demographic and claims data). The remaining increase is attributable to estimated liabilities for medical claims incurred but not reported.

STATEMENTS OF NET COST (Note 11)

Net Cost of Operations increased \$33 billion (459%), which is primarily caused by the year to date change in actuarial liability and a decrease in revenue earned. In 2019, the actuarial liability increased \$37.9 billion. In 2018, the actuarial liability increased \$8.4 billion, which impacts Net Cost by \$29.5 billion. In addition, there was a \$1.6 billion decrease in interest earnings on investments primarily attributable to inflation caused by market conditions, and a \$1.5 billion decrease in the Treasury amortization and service contributions in FY 2019 as directed by the DOD Board of Actuaries.

STATEMENTS OF BUDGETARY RESOURCES (SBR) (Note 13)

Agency outlays, net, decreased \$196.2 million (3%) attributable to a decrease of \$847.0 million from the annual contribution made by Department of the Treasury. See Note 19, Statement of Net Cost, for additional information.

The Net Amount of Budgetary Resources Obligated for Undelivered Orders increased \$9.8 million (9%) and is primarily from the increase in retail pharmacy prescriptions which in turn causes a decrease in Federal Mail Order replenishment costs.

Assets

Assets of \$278.8 billion, included in the Comparative Financial Data table on page 6 and shown in Figure 1, represent amounts that the MERHCF owns and manages. Assets increased by \$12.2 billion during FY 2019. This increase is largely attributable to a net increase in investments of \$12.2 billion. The net increase in investments is related to expected normal growth to cover unfunded portions of future military retirement benefits. Funds not needed to pay current benefits are invested in U.S. Treasury securities.

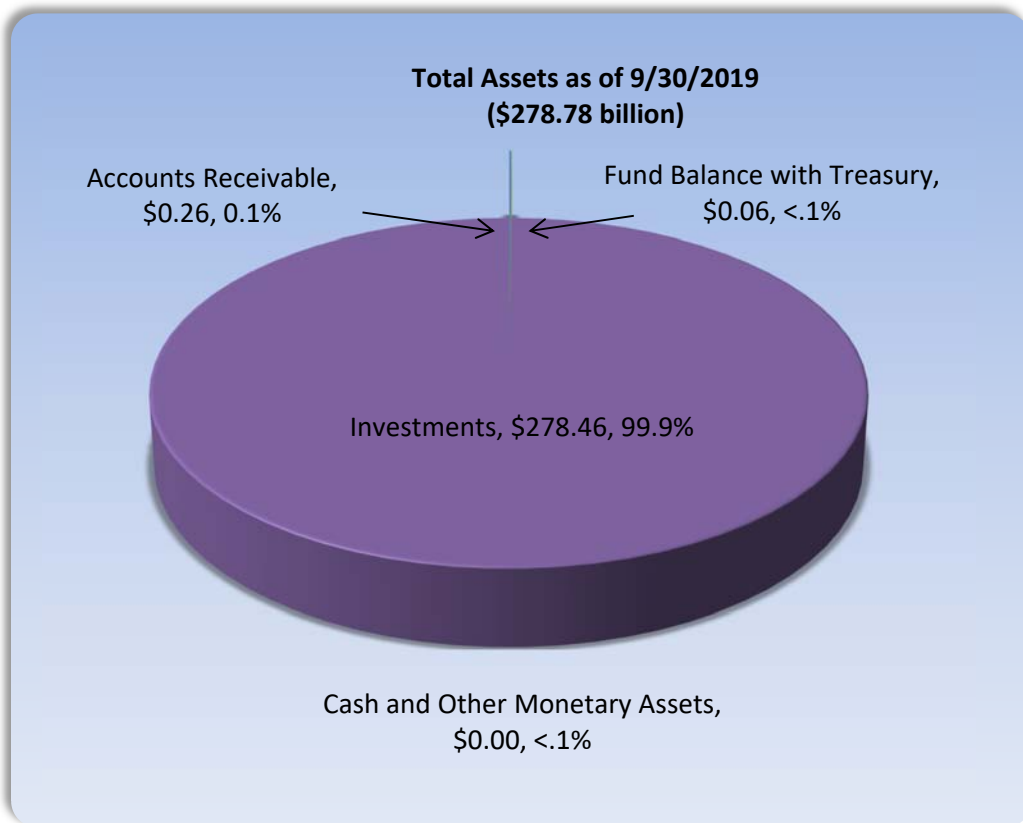

Figure 1

Investments

The Fund receives investment income from a variety of U.S. Treasury-based instruments such as bills, notes, bonds, and overnight investment certificates. U.S. Treasury bills are short-term securities with maturities of less than one year issued at a discount. U.S. Treasury notes are intermediate securities with maturities of one to ten years. U.S. Treasury bonds are long-term debt instruments with maturities of greater than ten years. Overnight certificates are interest-based market securities purchased from the U.S. Treasury that mature the next business day and accrue interest based on the Federal Reserve Bank of New York survey of reserve repurchase agreement rates.

Figure 2 below depicts the par value of investment holdings (includes inflation and interest receivable), net of amortization, as of September 30, 2019.

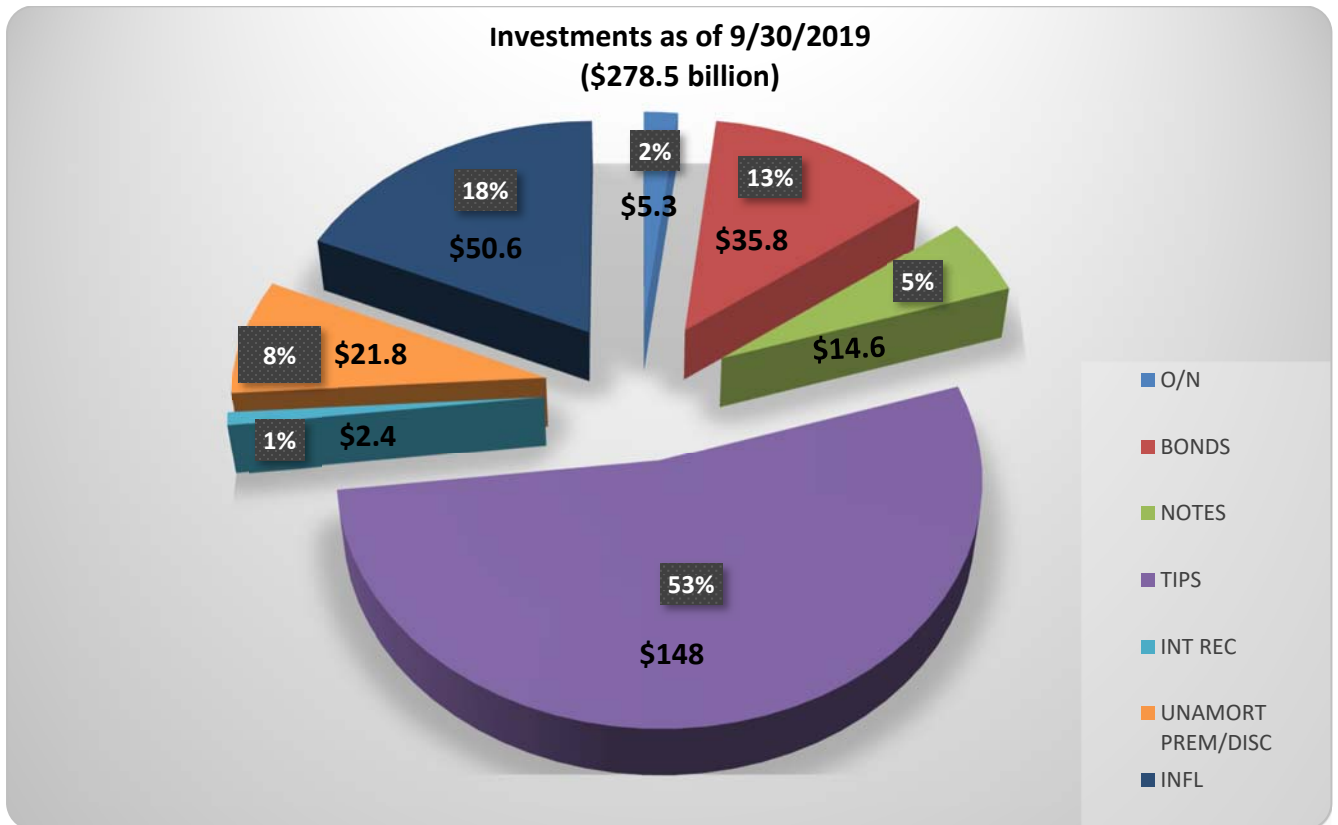

Figure 2

The Fund also invests in U.S. Treasury Inflation Protected Securities (TIPS), which are indexed for inflation. TIPS are fixed-rate instruments designed to protect against inflation, and the principal amount is indexed to the consumer price index (CPI) by adjusting the CPI at issuance to the current CPI; as inflation increases, so does the principal amount.

All of these instruments are debt obligations of the U.S. Government and are backed by the “full faith and credit” of the federal government. Debt obligations of the U.S. Government have virtually no risk of nonpayment of principal and interest at the specified due date.

The Fund receives management oversight from the DoD Investment Board established in September 2003. The members of the Investment Board are the Director, Defense Finance and Accounting Service; the Deputy Chief Financial Officer (CFO), OUSD(C); and a senior military member from the financial management community. The Investment Board reviews the public law governing the Fund and U.S. Treasury guidelines to ensure compliance with statutory authority and broad policy guidance, respectively.

Liabilities

Liabilities of \$574.2 billion included in the Comparative Financial Data table and shown in Figure 3 represent liabilities related to military retirement medical benefits for Medicare-eligible beneficiaries. The liabilities of the MERHCF primarily consist of actuarial liability for future benefit payments. Liabilities increased by \$37.9 billion during FY 2019. This increase is largely attributable to the increase in the actuarial liability.

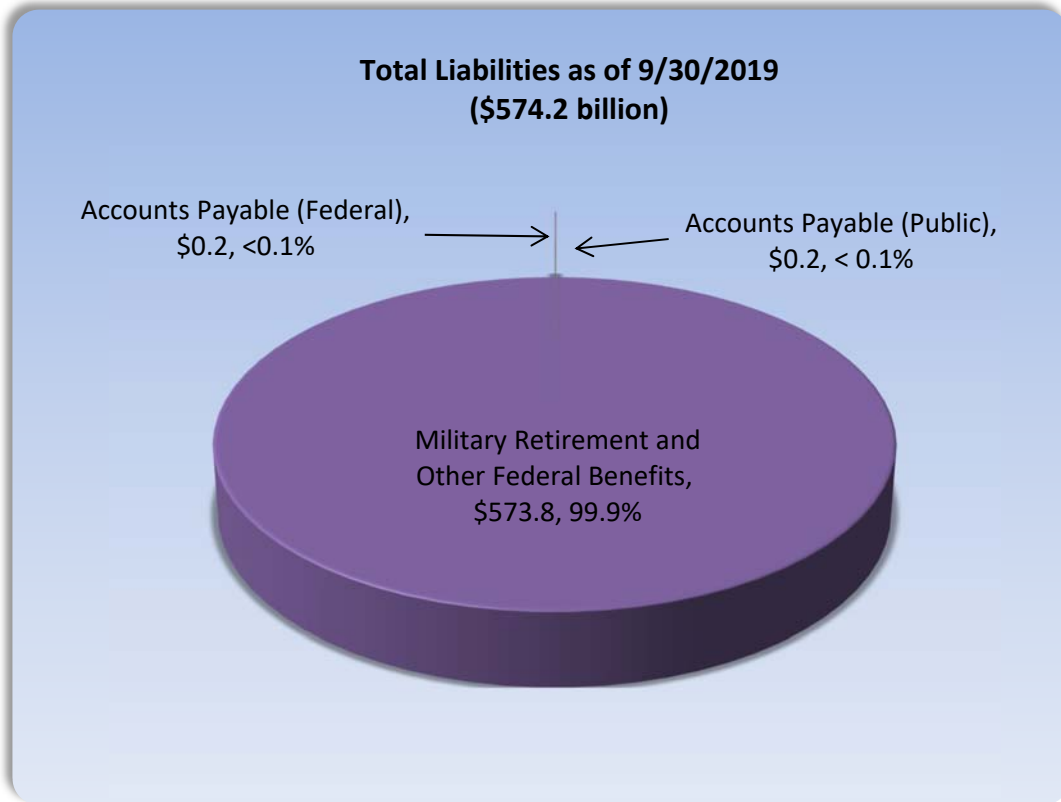

Figure 3

MERHCF Requirements and Funding Plan

In FY 2019 and FY 2018 respectively, the Fund authorized approximately \$10.6 billion and \$10.4 billion in total health care services, \$8.3 billion and \$8.2 billion to civilian providers for purchased care, \$1.8 billion and \$1.7 billion to MTFs, and \$0.5 billion and \$0.5 billion to Military Service Personnel Accounts, on behalf of Medicare-eligible retirees, retiree dependents, and survivors. Purchased Care end of year MERHCF obligations were \$8.1 billion and \$7.8 billion in FY 2019 and FY 2018 respectively.

Management's Discussion And Analysis

During the last two years of the Fund's operation, requirements were funded at the following amounts:

\$ In Billions				
Fiscal Year	Purchased Care	Operations & Maintenance	Military Personnel	Final
2019	\$8.3	\$1.8	\$0.5	\$10.6
2018	\$8.2	\$1.7	\$0.5	\$10.4

MERHCF Revenues and Contributions

The Fund receives income from three sources:

1. An annual U.S. Treasury payment made on behalf of the Uniformed Services at the beginning of the year based on average budgeted force strengths,
2. Annual payments from the U. S. Treasury to amortize the unfunded liability, and
3. Investment income

During the last two years of the Fund's operation, income was received from the above sources at the following amounts:

\$ In Billions			
Fiscal Year	Treasury Unfunded Actuarial Liability (UAL) Payment	Normal Cost Contribution	Interest on Investments
2019	\$5.7	\$7.8	\$9.1
2018	\$6.6	\$8.4	\$10.6

Amounts contributed to MERHCF by the DoD, other uniformed services, and the U. S. Treasury must be based on determinations by the OACT under methods and assumptions approved by the MERHCF Board in accordance with applicable provisions of Sections 1111 through 1117 of Title 10, U.S. Code and DoD policy established in the FMR, Volume 12, Chapter 16, October 2015.

4. SYSTEMS, CONTROLS AND LEGAL COMPLIANCE

Management Assurances

Federal Managers' Financial Integrity Act (FMFIA). The FMFIA requires executive branch agencies to provide annual assurance statements regarding systems of accounting and administrative control. Accounting and administrative controls include program, operational and administrative areas, as well as accounting and financial management.

OMB Circular A-123 is the government-wide implementation guidance for FMFIA. The DHA and TFAR conducted assessments of the effectiveness of internal controls over financial reporting in accordance with OMB Circular A-123, and Appendix A, Internal Control over Financial Reporting. The OMB guidance in Appendix A establishes a strengthened management process for assessing internal control over financial reporting and requires an additional and separate annual statement of assurance specifically addressing the effectiveness of internal control over financial reporting. The objectives of the systems of internal controls of MERHCF are to provide reasonable assurance of:

- Effectiveness and efficiency of operations,
- Reliability of financial reporting, and
- Compliance with applicable laws and regulations.

The evaluation of internal controls for the statement of assurance extended to every responsibility and activity undertaken by the organizations that execute the MERHCF and applies to program, administrative, and operational controls. The internal control testing follows the Financial Improvement and Audit Readiness (FIAR) Guidance established by the OUSD(C). This process includes the development of process flowcharts and narratives that include the identification of key controls that address FIAR-defined Financial Reporting Objectives, risk assessments associated with those key controls, test plans for those key controls, and reporting of test results based on execution of those test plans. Based on the results of this assessment, the DHA and TFAR are able to provide a qualified statement of assurance that the internal controls over financial reporting as of June 30, 2019 were operating effectively with the exception of the material weakness noted in this section under "Material Weakness 2019."

Federal Financial Management Improvement Act (FFMIA) (PL 104-208). The DHA internal review of MERHCF also included the effectiveness of the internal controls over the integrated financial management systems for DHA, SMA, and MERHCF financial statement reporting entities. For MERHCF, the DHA is able to provide a qualified statement of assurance that the internal controls over the integrated financial management system as of September 27, 2019, are in compliance with the Federal Financial Management Improvement Act and OMB Circular A-123 Appendix D with the exception of one systems non-conformance noted in this section under "Material Weakness 2019."

Please see Exhibits 1 and 2 in the Other Information section for additional details on management assurances and a discussion of controls and reporting on improper payments.

Material Weakness 2019

The MERHCF independent auditors noted one material weakness during the FY 2019 Financial Statement Audit.

Direct Care Costs Data Accumulation

Health care cost data from the MTFs provided for the direct care cost estimation process is aggregated or derived from information in both financial and non-financial systems within the DHA SMAs. The MTF-level data is based on budget execution processes rather than accrual-based accounting. While activity-based costing techniques are used to estimate program costs related to the MTFs, the costs being allocated cannot be related to specific appropriations. In addition, the health care encounters for MERHCF beneficiaries are not tracked for accounting purposes in financial general ledger systems, resulting in no transactional patient-level data to support the direct care costs recognized by the MERHCF. The MERHCF prospective payments are made to SMAs in advance of health care provided. The MERHCF, however, recognizes the payments as expenses upon the transfer of funds, which is not in compliance with Federal accounting standards.

There is also insufficient evidence that appropriate and consistent cut-off accounting activity occurs at the MTF level associated with care provided to MERHCF beneficiaries. As of FY 2019, the MERHCF had not yet implemented appropriate and sufficient levels of management control and reconciliation processes to ensure the adequacy and completeness of the data required for its financial reporting and actuarial valuation processes associated with direct care. The auditor noted the MERHCF performs annual retrospective reconciliation reviews of the MTF patient workload data for purposes of comparing the two-year historical data used in the prospective payment development to the actual patient workload realized in the year of payment. The reconciliations are performed in the following FY after all payments have been made, and the results of the reconciliations are used for the purpose of determining if any significant transfer of funds should be returned to the MERHCF, as well as to adjust the prospective payment methodology as may be warranted.

Finally, there is insufficient evidence effective controls exist and have been implemented to ensure the timeliness and accuracy of the medical record coding processes at the MTFs, which is a significant factor in the allocation process for assigning costs to the MTFs.

Direct Care Cost Accumulation

At issue with the conditions of unaudited, non-accrual based MTF level data and the lack of Standard Financial Information Structure (SFIS) compliant accounting systems is the fact that direct health care costs provide input to the development of the actuarially determined long-term health care liability of MERHCF, as well as the determination of amounts contributed by the branches of military service for active duty participants. The actuarial liability for direct care related to Medicare-eligible retiree benefits as of September 30, 2019 and 2018 is approximately \$129.9 billion (23% of total) and \$118.1 billion (22% of total), respectively, which reflects the actuarial present value of the projected direct-care costs of benefits to be provided by MTFs to MERHCF beneficiaries.

Additionally, the reported amounts of program revenues and cost for the year ended September 30, 2019, include approximately \$3.3 billion and \$2.3 billion, respectively, and for the year ended September 30, 2018, include approximately \$3.5 billion and \$2.2 billion, respectively, of amounts related to direct care costs. Such MTF-related amounts of direct-care costs are based on cost allocation methods using data extracted from various Service-specific financial, personnel, and workload systems within DoD as well as patient encounter data. With respect to the extracted data, the MTFs do not have OMB Circular A-123 Appendix D, FFMIA compliant, transaction-based accounting systems and cannot report the costs of an individual patient's care.

Transaction-level cost accounting systems are currently not available within TRICARE. However, the DoD has developed a cost allocation tool, the MEPRS, which enables MTFs to allocate all costs associated with the daily operation of the facility into the inpatient, outpatient, dental, and ancillary service cost centers. Average costs per weighted workload unit can then be computed for various patient care activities.

The average costs per weighted workload unit are then applied to specific care provided to specific patients by reviewing the Standard Inpatient Data Record (SIDR) and Comprehensive Ambulatory/Professional Encounter Record System (CAPERS) reported in the MHS Data Repository. The SIDRs and CAPERS are prepared for each patient encounter and contain patient-specific information, to include name, Social Security Number, sponsor or dependent status, and Medicare eligibility. Further, the SIDRs and CAPERS reflect the diagnosis and any procedures performed on the patient for that specific encounter. The average costs per weighted workload unit computed in MEPRS is then applied against the specific data contained in the SIDRs and CAPERS to determine an average cost for care provided to a specific patient. Estimates of the weighted workload provided to Medicare-eligible beneficiaries are calculated for each MTF based on historical experience. When the weighted workload costs are applied against the projected workload volume for each MTF, a prospective payment distribution plan can be computed for each MTF for the next FY.

While inpatient and ambulatory encounter costs are weighted at the MTF level as described above, MTF outpatient pharmacy costs represent the largest cost driver for the direct care portion of the actuarial liability. The reconciliation tasks performed by DHA management's support contractor have also assessed and documented the operation of Pharmacy Data Transaction Service, data to support both the prospective payment and calculation of the actuarial liability. The MERHCF Rate Summary Analysis is a process by which the DHA determines the annual prospective payment to the Service and the National Capital Region Medical Directorate (NCR MD) MTFs for the coverage of the pharmaceutical ingredient costs associated with dispensing to Medicare-eligible retirees. The ingredient costs for pharmaceuticals dispensed for Medicare-eligible retirees at MTFs are calculated based on the Prime Vendor invoices for all continental United States (CONUS) based facilities for the National Drug Codes within their Generic Sequence Numbers based on a weighted average basis of the average acquisition cost (the price paid by the MTF for the pharmaceutical product) during the relevant FY.

The prospective payments made to the MTFs are reconciled with actual workload activity after the close of the FY. The results of the reconciliation are used to adjust projections of MTF workload levels and costs for the future prospective payment distribution plan. The results of the

reconciliation will not be used to make adjustments to the current prospective payment distribution plan either during execution year activities or to a specific distribution subsequent to the close of the FY's operation.

Issues with the prospective payment process include non-accrual based expenditures, auditability of the SMAs' validation and reconciliation of the financial data prior to its input into the MEPRS cost allocation process, archiving MEPRS data at the close of each month, and reconciling in a timely manner the FY prospective payment plan.

Actions Taken

Since FY 2003, when the Fund was established, MERHCF management has attempted to resolve auditor-identified material weakness through the development of key milestone initiatives. These initiatives were established and managed by DHA leadership and intended to serve as work-around solutions because MERHCF management cannot address the Military Services financial systems' or MTF-level data deficiencies. The material weakness is associated with the computation of that portion of the MERHCF health care liability involving the care provided to Medicare-eligible beneficiaries in the MTFs.

To mitigate risks associated with this weakness, and to initiate appropriate corrective actions, we are developing, in conjunction with the development and deployment of the new electronic health record, a revised financial improvement plan with key milestones to incorporate a methodology to use patient itemized bills (inpatient admissions & outpatient encounters) to address the auditor-identified weakness related to direct care. Original corrective action focused on development of a per capita rate, which has proven to be unattainable. Use of itemized patient bills for all patients provided care in our MTFs will offer the necessary transaction-level audit trail for MTF care needed for full audit (MTF care along with purchased care services) of the MERHCF financial statements & will be attainable with the deployment of the new Electronic Health Record scheduled for full deployment across the MHS by close of FY 2025. This methodology will also be used by the OACT to compute the MERHCF Direct Care portion of the health care liability. The use of real time itemized patient bills will enable the MERHCF to eliminate the need to rely on MTFs for auditable financial information and, thus, move to an unqualified audit opinion independent of the Military Uniformed Services' receipt of unqualified audit opinions on their financial statements.

Information Technology (IT) Significant Deficiency on Access Controls and Configuration Management

In FY 2019, the audit identified a significant deficiency pertaining to certain Information Systems used by the MERHCF.

The MERHCF operates or relies on external providers for administration of multiple key financial management systems, including two core accounting systems and multiple financial support systems. The Defense Manpower Data Center (DMDC) Core Infrastructure (dCore), Defense Enrollment Eligibility Reporting System (DEERS), Naval Postgraduate School (NPS) Mainframe, and Purchased Care Operations System (PCOS) systems support key medical benefit payment

activities. dCore, DEERS and NPS mainframe systems are administrated by the DMDC, while the PCOS system is administrated by the DHA.

The audit identified MERHCF, through the support systems of DMDC and the DHA, has several deficiencies in the design and operating effectiveness of internal controls related to key financial support systems and service organization systems. While the audit noted that no single control deficiency meets the level of a significant deficiency, in combination, the deficiencies noted were elevated to a significant deficiency due to the pervasiveness of the weaknesses throughout the information system environment, MERHCF's reliance on these systems for financial reporting, and the nature of the deficiencies repeating from the prior year.

Without effective controls throughout the information system environment, the risk of unauthorized access and information system changes increases, thereby increasing the risk to the systems and the data confidentiality, integrity, and availability.

MERHCF and DMDC agreed with the audit findings received. Notices of Findings and Recommendations (NFRs) identified during the FY 2018 audit were not remediated in a timely manner which caused repeat findings under the FY 2019 audit. Corrective Action Plans (CAPs) established in FY 2019 that failed to be fully implemented are required to be modified with new completion dates. MERHCF will implement an aggressive monitoring program with DMDC and PCOS to ensure CAP milestone dates are met for remediation efforts in FY 2020. For specific details please reference the "Independent Auditor's Report on Internal Control over Financial Reporting" included in the Financial Section of this report.

DHA Business Support Directorate - Program Integrity Office

The DHA Business Support Directorate (BSD) - Program Integrity Office manages anti-fraud and abuse activities for DHA to protect benefit dollars and safeguard eligible beneficiaries. Program Integrity responsibilities include:

- Central coordinating office for allegations of fraud and abuse within the TRICARE Program.
- Develops and executes anti-fraud/abuse policies and procedures.
- Monitors and provides oversight of contractor program integrity activities.
- Develops cases for criminal fraud/abuse prosecutions and civil fraud/abuse lawsuits.
- Coordinates investigative activities and exchanges information with the Department of Justice (DoJ), law enforcement agencies, federal agencies, and state agencies.
- Initiates administrative remedies to enforce provisions of the law, regulation and policy in the administration of TRICARE program.

5. OTHER MANAGEMENT INFORMATION

Management Initiatives

All Retiree Fund Proposals. As mentioned in the December 2013 (as well as December 2005 and 2009) *Report to the President and Congress on the Department of Defense Medicare-Eligible Retiree Health Care Fund* submitted by the OACT, a significant portion of military retiree health benefits are not covered by the MERHCF. Benefits for retirees who are not yet Medicare-eligible are a significant cost because of the young age at which many military members retire, and because

the program pays for the full cost of their health care (whereas under the Medicare-eligible program, a large portion is paid by Medicare). The OACT noted that both the private sector and public sector (states and municipalities follow Government Accounting Standards Board Statements No. 43 and 45) account for both pre-Medicare and post-Medicare retiree health benefits on an advance accrual basis. The MERHCF Board believes that consideration should be given to extend the Fund to cover all retiree health care costs, so that the budgetary treatment of pre-Medicare retiree health costs would be similar to the treatment of Medicare-eligible retiree costs, and all of the economic efficiencies and proper incentives promoted by the Fund would reflect the full cost to DoD of future retiree benefit entitlements being earned by military members' current service. MERHCF management agrees with the OACT recommendation.

Financial Management Systems Framework

MERHCF Reliance on SMA Financial Systems and Data. The cost of care provided directly in MTFs and medical coding record data used in direct care cost allocations is reported to the MDR by the Army Medical Command (SMA-Army), Navy Bureau of Medicine and Surgery (SMA-Navy), Air Force Medical Service (SMA-Air Force), and the SMA-NCR MD. The MERHCF direct care funding is executed by the four SMA Components, each of which relies on the financial systems and procedures of its parent Line Service.

The one material weakness identified in the MERHCF audit is directly related to the SMAs' financial management systems, data accumulation, and financial reporting deficiencies. MERHCF management has no direct control over SMA financial management systems or data compliance. The Accounting and Financial Integrity (A&FI) branch of the DHA BSD's Budget & Resource Management continually strives to work with the SMA representatives to improve the SMA audit readiness by following the FIAR guidance and objectives.

In FY 2015, the SMA underwent an examination of the Statement of Budgetary Activity and received an adverse opinion. In FY 2018 and FY 2019 the SMA underwent an audit of its financial statements. From the audit and the resulting issuance of Notices of Findings and Recommendations (NFRs), SMA officials are able to better develop corrective action plans to ultimately address discrepancies and prepare for additional SMA audits.

TRICARE Standard Discount Program (SDP) formerly known as Mandatory Agreements Retail Refunds (MARR)

The SDP (Program 006) is a Standard or Minimum Refund, formerly known as MARR, on a Section 703 Covered Drug. It is by law equal to the difference between Non-Federal Average Manufacturer Price (Non-FAMP) and Federal Ceiling Price (FCP) ($FCP = 76\% \times \text{Non-FAMP}$).

The NDAA for FY 2008, §703 enacted 10 U.S.C. 1074g(f) which mandated all covered TRICARE Retail Pharmacy Network prescriptions filled after January 28, 2008, be subject to FCP.

The initial rule, published in the Code of Federal Regulations at 32 C.F.R. 199.21(q), subjected the TRICARE retail pharmacy program to pricing standards known as FCP by prohibiting pharmaceutical manufacturers from receiving more than the FCPs for pharmaceuticals purchased by DoD for the TRICARE retail pharmacy program.

The OGC requested waiver/compromise authority from DoJ, received it, and has resolved all pending waiver/compromise requests applicable to the "Retro Period" (January 2008 through June 2009) based upon the provisions of 32 C.F.R. §199.11.

TRICARE Additional Discount Program (ADP) formerly known as Voluntary Agreements Retail Rebates (VARR)

The DHA initiated a new retail pharmacy rebate program during FY 2007, ADP, formerly known as VARR. Manufacturers may offer rebates to the DoD for pharmaceutical agents dispensed through the TRICARE Retail pharmacy network. The Uniform Formulary VARR (UF-VARR) is contingent upon pharmaceutical agents being included on the 1st (generic drugs) or 2nd (formulary brand drugs) tiers of the DoD Uniform Formulary. There are two types of additional discounts:

- ADP #1 (Program 009) - WAC (% of Wholesale Acquisition Cost): The manufacturer's list price for the drug to wholesalers or direct purchasers in the United States, not including prompt pay or other discounts, rebates or reductions in price, as reported in wholesale price guides or other publications of drug pricing data.
- ADP #2 (Program 010) – (FCP - additional discount): The maximum price the manufacturer can charge for a Federal Supply Schedule (FSS) listed drug to the Big 4 - VA, DoD, PHS, and the Coast Guard; calculated annually by VA using Non-FAMP and other data submitted by the manufacturer.

The table on the following page highlights DoD activity since the inception of the Program. DoD has collected \$12.9 billion to date and continues rigorous collection efforts for both programs.

Management's Discussion And Analysis

TRICARE Retail Pharmacy Refunds Program

Program To Date (CY 2008-3rd Quarter, CY 2019)	Total	DHP	Non-DoD	MERHCF
SDP -				
Billed	\$8,275,971,255	\$3,747,520,563	\$128,080,530	4,400,370,162
Collected	(8,011,628,446)	(3,638,088,118)	(123,515,851)	(4,250,024,477)
Net	264,342,809	109,432,445	4,564,679	150,345,685
ADP -				
Billed	5,025,821,251	2,269,613,897	78,648,323	2,677,559,031

Net	164,812,218	68,581,627	2,689,714	93,540,877
UDC ¹	(72,981)	(30,507)	(1,192)	(41,282)
Total -				
Billed	\$13,301,792,506	\$6,017,134,460	\$206,728,853	\$7,077,929,193
Collected	(12,872,637,479)	(5,839,120,388)	(199,474,460)	(6,834,042,631)
UDC	(72,981)	(30,507)	(1,192)	(41,282)
Net	\$429,082,046	\$177,983,565	\$7,253,201	\$243,845,280
Aging -				
Current	\$391,349,602	\$161,953,047	\$6,327,343	\$223,069,212
61 Days to 2 Years ²	10,708,313	4,144,697	525,537	6,038,079
Over 2 Years	27,024,131	11,885,821	400,321	14,737,989
Total³	\$429,082,046	\$177,983,565	\$7,253,201	\$243,845,280

1. UDC applied to CY19.

2. Pharmacy debt not delinquent until 70 days. 70-day A/R aging bucket not available; 61-day aging used instead.

3. 3QCY2019 Estimate added to Billings to reconcile with A/R: \$111,639,000 MERHCF; \$84,219,000 DHP & Non-DoD.

TRICARE has a waiver dated September 23, 1996, 10 USC 1079a, *Champus: Treatment of Refunds and Other Amounts Collected* that states:

“All refunds and other amounts collected in the administration of the Civilian Health and Medical Program of the Uniformed Services shall be credited to the appropriation available for that program for the fiscal year in which the refund or amount is collected.”

Thus TRICARE records all Collections/Refunds into the current year and decreases budgetary disbursements for the current year. The refunds collected are not treated as offsetting collections.

The DHA in FY 2019 continued to aggressively collect pharmacy refunds for both the Standard and Additional Discount Programs. Through the concerted efforts of CRM, POD, HCDA, and OGC, DHA's collection rate has continued to average 97% - 99%.

6. LIMITATIONS ON THE FINANCIAL STATEMENTS

The principal financial statements have been prepared to report the financial position and results of operations for the MERHCF pursuant to the requirements of the CFO Act of 1990. While the statements have been prepared from the books and records of the MERHCF in accordance with the U.S. generally accepted accounting principles (U.S. GAAP) for Federal entities and the formats prescribed by OMB, these statements are in addition to the financial reports used to monitor and control budgetary resources which are prepared from the same books and records. The statements should be read with the realization they are for a component of the U.S. Government, a sovereign entity.

Footnotes to the Principal Statements

Note 1. Significant Accounting Policies

A. Mission of the Reporting Entity

The mission of MERHCF is to accumulate funds in order to finance, on an actuarially sound basis, liabilities of health care programs for DoD Military Services and other Uniformed Services. The MERHCF provides benefits for a Medicare-eligible member of a participating Military Service or other Uniformed Service entitled to retired or retainer pay and such member's Medicare-eligible dependents or survivors.

B. Basis of Presentation

These financial statements have been prepared to report the financial position and results of operations for MERHCF, as required by the CFO Act of 1990, expanded by the Government Management Reform Act of 1994, and other appropriate legislation. The financial statements have been prepared using the books and records of MERHCF in accordance and to the extent possible, with U.S. GAAP promulgated by the Federal Accounting Standards Advisory Board; OMB Circular No. A-136, "Financial Reporting Requirements"; and the FMR. The accompanying financial statements account for all resources for which MERHCF is responsible unless otherwise noted.

The MERHCF currently has one auditor-identified financial statement material weakness: Direct Care Costs Data Accumulation. Health care cost data from the MTFs provided for the direct care cost estimation process is aggregated or derived from information in both financial and non-financial systems within the DHA SMAs. The MTF-level data is based on budget execution processes rather than accrual-based accounting. While activity-based costing techniques are used to estimate program costs related to the MTFs, the costs being allocated cannot be related to specific appropriations. In addition, the health care encounters for MERHCF beneficiaries are not tracked for accounting purposes in financial general ledger systems, resulting in no transactional patient-level data to support the direct care costs recognized by the MERHCF. The MERHCF prospective payments are made to SMAs in advance of health care provided. The MERHCF, however, recognizes the payments as expenses upon the transfer of funds, which is not in compliance with Federal accounting standards.

There is also insufficient evidence that appropriate and consistent cut-off accounting activity occurs at the MTF level associated with care provided to MERHCF beneficiaries. As of FY 2019, the MERHCF had not yet implemented appropriate and sufficient levels of management control and reconciliation processes to ensure the adequacy and completeness of the data required for its financial reporting and actuarial valuation processes associated with direct care.

Finally, there is insufficient evidence effective controls exist and have been implemented to ensure the timeliness and accuracy of the medical record coding processes at the MTFs, which is a significant factor in the allocation process for assigning costs to the MTFs.

Accounting standards require all reporting entities to disclose that accounting standards allow certain presentations and disclosures to be modified, if needed, to prevent the disclosure of classified information.

DoD MERHCF Footnotes to the Principal Financial Statements

C. Use of Estimates

The MERHCF's management makes assumptions and reasonable estimates in the preparations of financial statements based on current conditions which may affect the reported amounts. Actual results could differ materially from the estimated amounts. Significant estimates include actuarial liabilities for military retirement.

D. Appropriations and Funds

Public Law 106-398, The Floyd D. Spence NDAA for FY 2001, authorized MERHCF and provided a permanent, indefinite appropriation. Permanent authority becomes available based upon standing provisions of law without any further legislative action by the Congress after transmittal of the budget for each year. The law does not specify an amount of budget authority for the indefinite appropriation; however, the law does specify a variable factor that determines the amount available until expended.

The MERHCF is a special fund. Accordingly, the funds in MERHCF are used, in compliance with the law, to provide benefits for the Medicare-eligible beneficiaries listed in paragraph 1A.

E. Basis of Accounting

The MERHCF's financial management systems record and report on the accrual basis. Financial and nonfinancial feeder systems and processes are updated from legacy systems to collect and report financial information in accordance with U.S. GAAP.

The financial statements and supporting trial balances are compiled from the underlying financial data. The underlying data for the MERHCF is largely derived from budgetary transactions (obligations, disbursements, and collections) and proprietary transactions (assets and liabilities) and accruals made for major items such as accounts receivable, accounts payable, and health care liabilities.

F. Revenues and Other Financing Sources

Using methods and assumptions approved by the MERHCF Board of Actuaries, the OACT determines the amount of the contributions to MERHCF. The contribution consists of two parts: a U.S. Treasury warrant for the amortization payment of the original unfunded liability and an annual contribution from each Uniformed Service: Army, Navy, Air Force, Marine Corps, U.S. Coast Guard, PHS, and National Oceanic and Atmospheric Administration. Funds from the contributions that exceed the amounts required to pay current year expenses are invested in long-term securities. These investments and their associated interest revenues will be used to cover future liabilities of MERHCF.

G. Recognition of Expenses

For financial reporting purposes, DoD policy requires the recognition of benefit expenses for the period incurred. Estimates are used in the computation of actuarial liabilities. The current financial management systems for MERHCF collect and record financial information on the full accrual accounting basis for liabilities and expenses of the fund.

DoD MERHCF Footnotes to the Principal Financial Statements

H. Accounting for Intragovernmental Activities

The Treasury Financial Manual Part 2 – Chapter 4700, “Agency Reporting Requirements for the Financial Report of the United States Government”, provides guidance for reporting and reconciling intragovernmental balances. The MERHCF is able to reconcile balances pertaining to investments in federal securities.

The DoD’s proportionate share of public debt and related expenses of the Federal Government is not included. The Federal Government does not apportion debt and its related costs to federal agencies. The DoD’s financial statements do not report any public debt, interest, or source of public financing, whether from issuance of debt or tax revenue.

I. Funds with the U.S. Treasury

The MERHCF’s monetary resources of collections and disbursements are maintained in U.S. Treasury accounts. The disbursing offices of the Defense Finance and Accounting Service (DFAS) and other Defense Agency financial service centers process the majority of MERHCF’s cash collections, disbursements, and adjustments worldwide. Each disbursing station prepares monthly reports that provide information to the U.S. Treasury on checks issued, electronic fund transfers, interagency transfers, and deposits.

In addition, DFAS and other DoD Agency service centers submit reports to the U.S. Treasury by appropriation on interagency transfers, collections received, and disbursements issued. The U.S. Treasury records these transactions to the applicable FBWT account.

The U.S. Treasury allows MERHCF to be fully invested; therefore, FBWT may be zero at various times during the FY. Controls are in place to prevent abnormal balances at the U.S. Treasury.

J. Cash and Other Monetary Assets

Cash is the total of cash resources under the control of DoD including coin, paper currency, negotiable instruments, and amounts held for deposit in banks and other financial institutions. The MERHCF transacts all business in U.S. dollars. See Note 5, Cash and Other Monetary Assets, for further information and disclosures.

K. Accounts Receivable

Accounts receivable from other federal entities or the public include accounts receivable, claims receivable, and refunds receivable. Allowances for uncollectible accounts due from the public are based upon factors such as: aging of accounts receivable, debtor’s ability to pay, and payment history. The DoD does not recognize an allowance for estimated uncollectible amounts from other federal agencies as receivables from other federal agencies are considered to be inherently collectible. Claims for accounts receivable from other federal agencies are resolved between the agencies in accordance with the Intragovernmental Business Rules published in the Treasury Financial Manual.

Since the beginning of the FCP Program, outpatient pharmaceuticals purchased by DoD for medical treatment facility pharmacies have been subject to FCPs, as have those under the TMOP program. The MERHCF implemented FCPs for the TRICARE Retail Pharmacy program in compliance with the NDAA for FY 2008, §703. The Final Rule was published March 17, 2009,

DoD MERHCF Footnotes to the Principal Financial Statements

with an effective date of May 26, 2009. The MERHCF applied this rule to all retail prescriptions filled on or after January 27, 2008, unless the DHA, formerly TMA, granted a waiver to a particular manufacturer. Compliance is mandatory and the advantage to the manufacturers is that their drugs will be included on the DoD Uniform Formulary (list of available prescription drugs). The MERHCF will record accounts receivable upon receipt of the calculation from the TRICARE Pharmacy Operations Directorate and will post collections from the manufacturers to the FY of receipt pursuant to Title 10, U.S.C. §1079a.

TRICARE has a waiver dated September 23, 1996, 10 USC 1079a, Champus: Treatment of Refunds and Other Amounts Collected that states: “All refunds and other amounts collected in the administration of the CHAMPUS shall be credited to the appropriation available for that program for the FY in which the refund or amount is collected.” Thus TRICARE records all collections/refunds into the current year and decreases budgetary disbursements for the current year. The refunds collected are not treated as offsetting collections.

L. Investments in U.S. Treasury Securities

The MERHCF reports investments in U.S. Treasury securities at cost, net of amortized premiums or discounts (book value). Premiums or discounts are amortized over the term of the investment using the effective interest method. The MERHCF’s intent is to hold investments to maturity unless they are needed to finance claims or otherwise sustain operations. Consequently, there is no provision for unrealized gains or losses on these securities.

The MERHCF invests in nonmarketable, market-based U.S. Treasury securities issued to federal agencies by the U. S. Treasury’s Bureau of Fiscal Service. These securities are not traded on any financial exchange but are priced consistently with publicly traded U.S. Treasury securities. The MERHCF receives interest semiannually from the U.S. Treasury on the value of these securities.

M. Contingencies and Other Liabilities

The SFFAS No. 5, “Accounting for Liabilities of the Federal Government,” as amended by SFFAS No. 12, “Recognition of Contingent Liabilities Arising from Litigation,” defines a contingency as an existing condition, situation, or set of circumstances that involves an uncertainty as to possible gain or loss. The uncertainty will be resolved when one or more future events occur or fail to occur. The MERHCF recognizes contingent liabilities when past events or exchange transactions occur, a future loss is probable, and the loss amount can be reasonably estimated.

Financial statement reporting is limited to disclosure when conditions for liability recognition do not exist but there is at least a reasonable possibility of incurring a loss or additional losses.

There are two cases or claims pending with the DHA meeting the threshold guidance. Information pertaining to these cases is disclosed in the Commitments and Contingencies disclosure in Note 9.

N. Net Position

Net position consists of cumulative results of operations. Cumulative results of operations represent the net of expenses, losses, and financing sources (including appropriations, revenue, and gains) since inception.

DoD MERHCF Footnotes to the Principal Financial Statements

O. Military Retirement and Other Federal Employment Benefits

The DoD applies SFFAS No. 33, “Pensions, Other Retirement Benefits, and Other Postemployment Benefits: Reporting the Gains and Losses from Changes in Assumptions and Selecting Discount Rates and Valuation Dates,” in selecting the discount rate and valuation date used in estimating actuarial liabilities. In addition, gains and losses from changes in long-term assumptions used to estimate the actuarial liability are presented separately on the Statement of Net Cost. Refer to Note 10, Military Retirement and Other Federal Employment Benefits, and Note 11, General Disclosures Related to the Statement of Net Cost, for additional information.

Note 2. Fund Balance with Treasury

As of September 30	<u>2019</u>	<u>2018</u>
(\$ In Thousands)		
Unobligated Balance – Unavailable	\$ 251,765,896	\$ 238,277,587
Obligated Balance not yet Disbursed	460,512	421,198
Non-FBWT Budgetary Accounts	<u>(252,163,833)</u>	<u>(238,604,397)</u>
Total	<u>\$ 62,575</u>	<u>\$ 94,388</u>

The Status of FBWT reflects the budgetary resources to support the FBWT and is a reconciliation between budgetary and proprietary accounts. It primarily consists of unobligated and obligated balances. The balances reflect the budgetary authority remaining for disbursement against current or future obligations.

Unobligated Balance is classified as available or unavailable and represents the cumulative amount of budgetary authority not set aside to cover future obligations. The unavailable balance consists primarily of funds invested in U.S. Treasury securities that are temporarily precluded from obligation by law. The unobligated balance for the MERHCF is restricted for use by the public law establishing the fund and becomes available without further congressional action.

Obligated Balance not yet Disbursed represents funds obligated for goods and services not received and those received but not paid. The MERHCF balance represents amounts payable to the Defense Logistics Agency (DLA) for purchases of pharmaceuticals, to private contractors waiting for DLA to replenish the pharmaceutical supply, and to private health care providers.

The MERHCF Non-FBWT Budgetary Account balance represents investments in U.S. Treasury securities that are reflected in the MERHCF’s budgetary resources, but are not part of the FBWT.

	<u>Cost</u>	<u>Amortization Method</u>	<u>Amortized (Premium)/ Discount</u>	<u>Interest Receivable</u>	<u>Investments, Net</u>	<u>Market Value Disclosure</u>
Intragovernmental Securities						
Nonmarketable, Market-Based	\$ 278,981,134	Effective Interest	\$ (15,090,257)	\$ 2,378,752	\$ 266,269,629	\$ 284,354,253
Total	\$ 278,981,134		\$ (15,090,257)	\$ 2,378,752	\$ 266,269,629	\$ 284,354,253

Information Regarding Investments and Related Interest

The MERHCF purchases and redeems nonmarketable, market-based U.S. Treasury securities fluctuating in tandem with the current selling price of the equivalent marketable securities on the open market. The MERHCF purchases securities with the intent to hold until maturity; therefore, balances are not adjusted to market value.

The cash generated from investments is deposited in the U.S. Treasury and is used for general Government purposes. The U.S. Treasury securities are issued to MERHCF as evidence of its receipts and are an asset to the MERHCF and a liability to the U.S. Treasury. Since MERHCF and the U.S. Treasury are both parts of the Federal Government, these assets and liabilities offset each other from the standpoint of the Federal Government as a whole. For this reason, they do not represent an asset or a liability in the U.S. Governmentwide financial statements.

The U.S. Treasury securities provide MERHCF with authority to access funds to make future benefit payments or other expenditures. When MERHCF requires redemption of securities to make expenditures, the Federal Government will meet the requirement by using accumulated cash balances, raising taxes or other receipts, borrowing from the public or repaying less debt, or curtailing other expenditures. The Federal Government uses the same method to finance all other expenditures.

At the semiannual meetings, the DoD Investment Board approves the strategy for the type of securities purchased by MERHCF. These securities can include U.S. Treasury bills, notes, bonds, inflation-protected securities, and overnight certificates. The U.S. Treasury bills are short-term securities with maturities of one year or less and are purchased at a discount. The U.S. Treasury notes have maturities of at least one year, but not more than ten years, and are purchased at either a discount or premium. The U.S. Treasury bonds are long-term securities with maturities of ten

DoD MERHCF Footnotes to the Principal Financial Statements

years or more and are purchased at either a discount or premium. The TIPS provide protection against inflation and are purchased at either a discount or premium. The TIPS principal increases with inflation and decreases with deflation, as measured by the CPI. When TIPS mature, the U.S. Treasury pays the adjusted principal or original principal, whichever is greater. The TIPS amount includes inflation compensation as well as the par value of the securities. Overnight securities are short-term securities purchased at face value. They mature the business day after purchase and earn interest at the daily Federal Reserve repurchase agreement rate.

The cost of the U.S. Treasury Securities is displayed in the following table.

	COST FY 2019 (in millions)		COST FY 2018 (in millions)
Notes	\$11,963	Notes	\$12,958
Bonds	46,169	Bonds	43,201
TIPS	226,002	TIPS	216,735
FRN	2,989	FRN	0
Overnights	5,328	Overnights	6,087
Total Cost	<u>\$292,451</u>	Total Cost	<u>\$278,981</u>

Note 4. Accounts Receivable

(\$ In Thousands)

	2019		
	<u>Gross Amount Due</u>	<u>Allowance For Estimated Uncollectibles</u>	<u>Accounts Receivable, Net</u>
Nonfederal Receivables (From the Public)	\$ 273,989	\$ (6,936)	\$ 267,053
Total Accounts Receivable	\$ <u>273,989</u>	\$ <u>(6,936)</u>	\$ <u>267,053</u>

(\$ In Thousands)

	2018		
	<u>Gross Amount Due</u>	<u>Allowance For Estimated Uncollectibles</u>	<u>Accounts Receivable, Net</u>
Nonfederal Receivables (From the Public)	\$ 281,777	\$ (6,746)	\$ 275,031
Total Accounts Receivable	\$ <u>281,777</u>	\$ <u>(6,746)</u>	\$ <u>275,031</u>

Information Related to Accounts Receivable

Accounts receivable represent the MERHCF's claim for payment from other entities. The MERHCF only recognizes an allowance for uncollectible amounts from the public. The allowance for uncollectible is calculated based on a percentage determined by taking a 12 month average of the accounts receivable balance against a 12 month average on the write off balance. An exception to this methodology exists for the Suspended Pharmacy receivables where 100% methodology is used. Claims with other federal agencies are resolved in accordance with the Intragovernmental Business Rules.

DoD MERHCF Footnotes to the Principal Financial Statements

As of September 30, 2019, the total net receivables recorded for the pharmaceutical Standard Discount Program (SDP) were \$143.6 million. This program resulted from the implementation of the Federal Ceiling Program for the TRICARE Retail Pharmacy Program as required by the FY 2008 National Defense Authorization Act, Section 703.

Also recorded are net receivables of \$84.7 million originating from the TRICARE ADP, a voluntary additional discount from pharmaceutical manufacturers for preferred products.

Note 5. Cash and Other Monetary Assets

(\$ In Thousands)	2019	2018
Cash	\$ 21	\$ 2,707
Total Cash and Other Monetary Assets	\$ 21	\$ 2,707

Cash and other monetary assets consist of undeposited collections received after the U.S. Treasury month-end cutoff. A corresponding liability is created because MERHCF is not entitled to use the funds until deposited with the U.S. Treasury. This liability is reported on Note 8.

Note 6. Liabilities Not Covered by Budgetary Resources

(\$ In Thousands)	2019	2018
Military Retirement and Other Federal Employment Benefits (Note 10)	\$ 322,081,522	\$ 297,671,422
Total Liabilities Not Covered by Budgetary Resources	322,081,522	297,671,422
Total Liabilities Covered by Budgetary Resources	<u>252,106,584</u>	<u>238,591,436</u>
Total Liabilities	\$ <u>574,188,106</u>	\$ <u>536,262,858</u>

The MERHCF Liabilities Not Covered by Budgetary Resources represents the portion of the actuarial liability for health benefits for which current assets are not yet available. Refer to Note 10, Military Retirement and Other Federal Employment Benefits, for additional details and disclosures.

Note 7. Accounts Payable

(\$ In Thousands)	2019	2018
Intragovernmental Payables	\$ 174,183	\$ 188,285
Nonfederal Payables (to the Public)	<u>166,484</u>	<u>122,857</u>
Total Accounts Payable	\$ <u>340,667</u>	\$ <u>311,142</u>

The Accounts Payable includes amounts owed to federal and nonfederal entities for goods and services received by the MERHCF. This balance represents amounts payable to DLA for purchases of pharmaceuticals, to private contractors waiting for DLA to replenish the pharmaceutical supply, and to private health care providers.

DoD MERHCF Footnotes to the Principal Financial Statements

Note 8. Other Liabilities

(\$ In Thousands)	<u>2019</u>	<u>2018</u>
Deposit Funds and Suspense Accounts	\$ 21	\$ 2,707

Deposit Funds and Suspense Accounts consist of undeposited collections received after the U.S. Treasury month-end cutoff. These undeposited collections are reported on Note 5.

Note 9. Commitments and Contingencies

The SFFAS No. 5, "Accounting for Liabilities of the Federal Government," as amended by SFFAS No. 12, "Recognition of Contingent Liabilities Arising from Litigation," defines a contingency as an existing condition, situation, or set of circumstances that involves an uncertainty as to possible gain or loss. The uncertainty will be resolved when one or more future events occur or fail to occur. The MERHCF recognizes contingent liabilities when past events or exchange transactions occur, a future loss is probable, and the loss amount can be reasonably estimated.

Financial statement reporting is limited to disclosure when conditions for liability recognition do not exist but there is at least a reasonable possibility of incurring a loss or additional losses. Examples of loss contingencies include the collectability of receivables, pending or threatened litigation, and possible claims and assessments. The MERHCF's risk of loss and resultant contingent liabilities arise from pending or threatened litigation or claims and assessments due to events such as medical malpractice; property or environmental damages; and contract disputes.

The MERHCF is a party in legal actions related to claims for contractual bid protests. We are not aware of any contingent liabilities for legal actions. Amounts disclosed for litigation claims and assessments are fully supportable and agree with MERHCF's legal representation letters and management summary schedule.

There are two cases or claims pending with the MERHCF disclosed below:

Ingham Regional Medical Center v. Secretary of Defense Charles Hagel (U.S. District Court for the District of Columbia). This class action suit was filed on behalf of every U.S. hospital that provided outpatient services to TRICARE beneficiaries between August 1, 2003, and December 31, 2009. This case is related to an earlier settlement with respect to radiology payments. In this action, plaintiffs alleged DoD, in reaching a resolution of hospital outpatient radiology claims, entered into contracts with the named plaintiffs' First Amended Complaint was filed on November 17, 2014. The Amended Complaint alleges action for breach of express contract, breach of implied contract, mutual mistake, breach of the covenant of good faith and fair dealing, and violations of a statutory mandate under the TRICARE laws. The suit alleges 5,200 hospitals were incorrectly underpaid for outpatient procedures. Plaintiffs filed two prior lawsuits with similar allegations in U.S. District Court. The first was dismissed with prejudice and the second was voluntarily withdrawn.

DoD MERHCF Footnotes to the Principal Financial Statements

The Government filed a motion to dismiss (MTD) plaintiffs' initial Complaint. Following briefing, at the April 16, 2014, oral argument, the Court ordered additional briefing to address whether the U.S. District Court would have jurisdiction over a contract implied-in-law. The Court ordered a third round of briefing; however, plaintiffs instead filed a motion for leave to file their First Amended Complaint. The Court allowed the First Amended Complaint. Government then filed a MTD. Briefing was concluded in March 2015. On March 22, 2016, the Court granted the Government's Motion to dismiss plaintiffs' Amended Complaint. Plaintiffs filed an appeal with the Court of Appeals for the Federal Circuit. The parties completed their appellate briefing. We anticipate the Court of Appeals will remand the case to the trial court level of the claims court for additional factual determinations. The Parties are proceeding with discovery. The likelihood of unfavorable outcome is REMOTE. The estimated range of potential loss is \$1 million to \$2.3 billion.

Based on the allegations in the Amended Complaint, the amount sought is \$215.6 million which presumably would be reduced by the \$100 million the Government has already paid. However, at the status conference, plaintiffs' counsel claimed the potential damages could be as high as \$2.3 billion.

Smart Pharmacy, Inc., et al. v. Vice Admiral Raquel C. Bono, Director, DHA U.S. District Court for the Middle District of Florida, No. 3:18-cv-525-J-39JBT. Plaintiffs are compound pharmacies. In response to revelations compound pharmacies had been submitting fraudulent claims to the Government, the DHA suspended claims processing payments for several compound pharmacies, including Plaintiffs, pending an investigation. Plaintiffs seek declaratory judgments prohibiting the DHA from suspending claim processing and payments, from collecting claim claw backs, and that the HHS OIG is violating federal laws and regulations. Plaintiffs allege the DHA improperly suspended claims processing, while the DHA contends it has authority to suspend claims processing under these circumstances.

Plaintiffs filed the Complaint on April 19, 2018, and mailed the Complaint and A Notice of a Lawsuit and Request to Waive Service of a Summons to Vice Admiral Bono on April 27, 2018.

The Government is reviewing the Complaint's allegations and will decide whether to file an Answer or dispositive motion(s).

Likelihood of an unfavorable outcome is REMOTE. The estimated range of potential loss is \$4 million to \$30 million.

DoD MERHCF Footnotes to the Principal Financial Statements

Information Related to Military Retirement and Other Federal Employment Benefits

The MERHCF accumulates funds to pay for health care programs for DoD and other Uniformed Services Medicare-eligible retirees and their Medicare-eligible dependents and survivors.

The schedules in the first two tables above reflect two distinct types of liabilities related to Military Retirement and Other Federal Employment Benefits. The line entitled “Military Medicare-Eligible Retiree Health Benefits” represents the actuarial (or accrued) liability for future health care benefits provided to Medicare-eligible retired beneficiaries that are not yet incurred, i.e., the present value of future benefits less the present value of future normal costs. The line entitled “Other” represents the incurred-but-not-reported reserve (IBNR), which is an estimate of MERHCF benefits already incurred but not yet reported to DoD.

This schedule also computes “unfunded liabilities”, i.e. liabilities not covered by budgetary resources. The assets presented in this schedule differ from those reported on the balance sheet. The balance sheet assets consist primarily of investments, the value of which is based on the fully amortized cost or “book value” of the securities (see Note 3, Investments and Related Interest). The value of assets available to pay benefits presented in the above schedule is based on available budgetary funding. The difference between investments and assets available to pay benefits is the premium on U.S. Treasury Securities. At the time of purchase, budgetary funding is reduced by the premium on U.S. securities because the premium on securities is no longer a budgetary resource.

Effective FY 2010, the MERHCF implemented requirements of SFFAS No. 33, which directs that the discount rate, underlying inflation rate, and other economic assumptions be consistent with one another. A change in the discount rate may cause other assumptions to change as well. For the September 30, 2019, financial statement valuation, the application of SFFAS No. 33 required OACT to set the long-term inflation (CPI) to be consistent with the underlying Treasury spot rates used in the valuation.

The MERHCF actuarial liability is adjusted at the end of each FY. The 4th Quarter, FY 2019 balance represents the September 30, 2019 amount that will be effective through 3rd Quarter, FY 2020.

Actuarial Cost Method

As prescribed by law, the MERHCF is funded using the Aggregate Entry-Age Normal (AEAN) cost method. Per SFFAS No. 5, AEAN is also used to compute the actuarial liabilities reported herein. AEAN is a method whereby projected retiree medical plan costs are spread over the projected service of a new entrant cohort.

Revenues

The MERHCF receives revenues from three sources: interest earnings on MERHCF assets, Uniformed Services normal cost contributions, and a U.S. Treasury contribution. The normal cost contributions are paid annually, at the beginning of the FY, by the U.S. Treasury from amounts appropriated to the Military Services and are calculated at the approved full-time and part-time per capita rates times the budgeted full-time and part-time force strengths, respectively. The contribution from the U.S. Treasury is also paid into the MERHCF annually, at the beginning of

DoD MERHCF Footnotes to the Principal Financial Statements

each FY, and represents the amortization of the unfunded liability for service performed before October 1, 2002, as well as the amortization of subsequent actuarial gains and losses. The MERHCF Board approves the methods and assumptions used to calculate the per capita normal cost rates and the U.S. Treasury contribution, and the Secretary of Defense directs the Secretary of Treasury to make the payments.

Assumptions

The Board sets the long-term assumptions for each valuation performed for funding purposes. Prior to FY 2010, the same long-term assumptions were used for the financial-statement valuations. The distinction between the two different valuations is discussed further below.

For the FY 2019 financial-statement valuation, the long-term assumptions include a 3.5% discount rate and medical trend rates that were developed using a 1.8% inflation assumption. (For the most recent funding valuation, the long-term assumptions included a 5.0% discount rate and medical trend rates that were developed using a 2.75% inflation assumption.) Note that the term 'discount rate' refers to the interest rate used to discount cash flows. The terms 'interest rate' and 'discount rate' are often used interchangeably in this context.

For the FY 2018 financial-statement valuation, the long-term assumptions included a 3.6% discount rate and medical trend rates that were developed using a 1.5% inflation assumption. (For the most recent funding valuation at the time of the FY 2018 financial statements, the long-term assumptions included a 5.25% discount rate and medical trend rates that were developed using a 2.75% inflation assumption.)

The difference in the long-term assumptions between funding and financial statement valuations is attributable to SFFAS No. 33. This applicable financial statement standard is described further below. Other assumptions used to calculate the actuarial liabilities, such as mortality and retirement rates, were based on a blend of actual experience and future expectations. Because of reporting deadlines and as permitted by SFFAS No. 33, the current year actuarial liability is rolled forward from the prior year valuation results as reported in OACT's '*Valuation of the Medicare-Eligible Retiree Health Care Fund*' using accepted actuarial methods. Modifications are made as necessary to convert liabilities to a financial-statement basis. For purposes of the Fund's financial reporting, this roll-forward process is applied annually.

DoD MERHCF Footnotes to the Principal Financial Statements

In calculating the FY 2019 “rolled-forward” actuarial liability, the following assumptions were used:

Discount Rate	3.5%
Inflation	1.8%

<u>Medical Trend (Medicare)</u>	<u>FY 2018 - FY 2019</u>	<u>Ultimate Rate FY 2043</u>
Direct Care Inpatient	2.50%	4.05%
Direct Care Outpatient	4.00%	4.05%
Direct Care Prescription Drugs	5.68%	4.05%
Purchased Care Inpatient	1.00%	4.05%
Purchased Care Outpatient	4.00%	4.05%
Purchased Care Prescription Drugs	5.67%	4.05%
Purchased Care USFHP	3.05%	4.05%

After a 25 year select period, an ultimate trend rate is assumed for all future projection years.

For the September 30, 2019, financial statement valuation, DoD OACT determined a single equivalent medical cost trend rate of 4.25% can be used to reproduce the total Military Retiree Health Benefits (MRHB) liability. The total MRHB liability includes Medicare-Eligible Retiree Health Care Fund (MERHCF), Service Medical Activity (SMA), and Contract Resource Management (CRM). The medical cost trend rate assumptions have a significant effect on the amounts reported. For example, if each of the assumed trend rates had increased by one percentage point, the actuarial liability would have increased 28.6%, or approximately \$163.9 billion.

Contributions to the MERHCF are calculated to maintain the Fund on an actuarially sound basis. This means there will be sufficient funds to make all benefit payments to eligible recipients each year, and the Fund balance is projected to eventually equal the actuarial liability; i.e., all unfunded liabilities are liquidated. In order to accomplish this, normal costs are calculated to fully fund the current year projected liability for active duty members and reservists. In addition, amortization payments are calculated to fund liabilities that were present at plan inception (initial unfunded liability) and any emerging actuarial gains or losses.

The initial unfunded liability of the program was amortized over a 50-year period through the FY 2012 payment. At its August 2012 and July 2017 meetings, the Board decided to decrease the period over which the initial unfunded liability is fully amortized by 5 years and 7 years, respectively. The reason for the shorter amortization period is to ensure that the annual amortization payment covers, at a minimum, the interest growth on the initial unfunded liability. The last payment on the initial unfunded liability is expected to be made October 1, 2039. In addition, at its July 2017 meeting, the Board reduced the amortization period for all actuarial gains and losses from 30 years to 20 years. Chapter 56 of Title 10, United State Code (U.S.C.), requires that the Board approve the methods and assumptions used to (1) compute actuarial costs and liabilities, (2) amortize the initial unfunded liability, and (3) amortize all actuarial gains and losses. The Board is a Federal Advisory Committee appointed by the Secretary of Defense.

DoD MERHCF Footnotes to the Principal Financial Statements

DoD complies with SFFAS No. 33, "Pensions, Other Retirement Benefits, and Other Postemployment Benefits: Reporting the Gains and Losses from Changes in Assumptions and Selecting Discount Rates and Valuation Dates." The standard requires the separate presentation of gains and losses from changes in long-term assumptions used to estimate liabilities associated with pensions, other retirement and other postemployment benefits. SFFAS No. 33 also provides a standard for selecting the discount rate and valuation date used in estimating these liabilities. SFFAS No. 33, as published on October 14, 2008, by the Federal Accounting Standards Advisory Board (FASAB) requires the use of a yield curve based on marketable U.S. Treasury securities to determine the discount rates used to calculate actuarial liabilities for federal financial statements. Historical experience is the basis for expectations about future trends in marketable U.S. Treasury securities.

The statement is effective for periods beginning after September 30, 2009, and applies to information provided in general purpose federal financial statements. It does not affect statutory or other special-purpose reports, such as pension or Other Retirement Benefit reports. SFFAS No. 33 requires a minimum of five periodic rates for the yield curve input and consistency in the number of historical rates used from period to period. It permits the use of a single average discount rate if the resulting present value is not materially different from what would be obtained using the yield curve.

The OACT annually performs two MERHCF valuations. The primary one is for funding purposes, is governed by Chapter 56 of Title 10 U.S.C. and must use methods and assumptions approved by the Board. The other valuation is for financial statement purposes and is governed by FASAB standards. For the September 30, 2019, financial-statement valuation, OACT determined a single equivalent discount rate of 3.5% by using a 10-year average of quarterly zero coupon Treasury spot rates. These spot rates are based on the U.S. Department of the Treasury – Office of Economic Policy’s 10-year Average Yield Curve for Treasury Nominal Coupon Issues (TNC yield curve), which represents average rates from April 1, 2009 through March 31, 2019. The same spot rate data source was used to produce last year’s financial statements. In the summer of 2019, the Board approved a discount rate of 5.00% for the September 30, 2018, funding valuation, which differs from the SFFAS No. 33 equivalent rate by 150 basis points. Using the SFFAS No. 33 long-term economic assumptions (as compared to the Board assumptions) increases the MERHCF actuarial liability by 25.8%.

FY 2019 Actuarial Liability for the Uniformed Services

The MERHCF liability includes Medicare liabilities for all Uniformed Services. The approximate breakout of the September 30, 2019, Medicare liability (\$ in thousands) for all Uniformed Services is as follows:

DoD	\$	559,372,374
Coast Guard		12,308,504
Public Health Service		1,447,727
National Oceanic and Atmospheric Administration		90,542
Total	\$	<u><u>573,219,147</u></u>

DoD MERHCF Footnotes to the Principal Financial Statements

FY 2019 Military Service and Other Uniformed Service Contributions

The FY 2019 Military Service and other Uniformed Service contributions to MERHCF (\$ in thousands) were as follows:

DoD	\$	7,532,997
Coast Guard		199,360
Public Health Service		28,891
National Oceanic and Atmospheric Administration		1,449
Total	\$	7,762,697

Market Value of MERHCF's Securities

The market value of MERHCF's nonmarketable, market-based securities as of September 30, 2019, totaled \$318.8 billion. This amount is also reported on Note 3, Investments.

Note 11. General Disclosures Related to the Statements of Net Cost

(\$ In Thousands)	2019	2018
Military Retirement Benefits		
Gross Cost	\$ 20,878,810	\$ 3,507,033
Less: Earned Revenue	(22,614,508)	(25,634,746)
Losses/(Gains) from Actuarial Assumption		
Changes for Military Retirement Benefits	27,513,910	14,949,519
Net Cost of Operations	\$ 25,778,212	\$ (7,178,194)

Information Related to the Statement of Net Cost

The Statement of Net Cost (SNC) represents the net cost of programs and organizations of MERHCF that are supported by appropriations or other means. The intent of the SNC is to provide gross and net cost information related to the amount of output or outcome for a given program or organization administered by a responsible reporting entity.

The following table displays the MERHCF intragovernmental revenue:

Intragovernmental Earned Revenue for Program Costs

(\$ in Billions)	FY 2019	FY 2018
1. Uniformed Services Contributions	\$ 7.8	\$ 8.4
2. U.S. Treasury Annual Unfunded Liability Payment	5.7	6.6
3. Interest on Investments	9.1	10.6
4. Total Intragovernmental Revenue	\$ 22.6	\$ 25.6

Uniformed Service Contributions represent the amount contributed by Treasury on behalf of the Uniformed Services at the beginning of each FY. The contribution rates are determined by the DoD Retirement Board of Actuaries and are based on approved per capita normal cost rates and expected average strengths for the Uniformed Services.

DoD MERHCF Footnotes to the Principal Financial Statements

Annual Treasury Unfunded Liability Payment represents the amortization of the unfunded liability for service performed before October 1, 2002, as well as the amortization of subsequent actuarial gains and losses.

Interest on Investments represents the interest income received by the MERHCF for FYs 2019 and 2018.

MERHCF costs are reported in accordance with SFFAS No. 33, Pensions, Other Retirement Benefits, and Other Postemployment Benefits: Reporting the Gains and Losses from Changes in Assumptions and Selecting Discount Rates and Valuation Dates.

Note 12. Disclosures Related to the Statement of Changes in Net Position

Reconciliation of Appropriations on the Statement of Budgetary Resources to Appropriations Received on the Statement of Changes in Net Position

(\$ in Thousands)	2019	2018
Appropriations, Statement of Budgetary Resources (SBR)	\$ 10,496,121	\$ 10,029,110
Permanent and Temporary Reductions	0	0
Trust and Special Fund Receipts	10,496,121	10,029,110
Miscellaneous items	<u>0</u>	<u>0</u>
Total Reconciling Difference	10,496,121	10,029,110
Appropriations Received, Statement of Changes in Net Position	\$ 0	\$ 0

There was a difference of \$10.5 billion between Appropriations Received on the Statement of Changes in Net Position (SCNP) and Appropriations on the SBR. MERHCF records contributions as revenue on the SCNP, while contributions are recorded as Appropriations on the SBR. This is in accordance with OMB reporting requirements.

Note 13. Disclosures Related to the Statement of Budgetary Resources

Budgetary Resources Obligated for Undelivered Orders

The Statement of Budgetary Resources (SBR) includes intraentity transactions because the statements are presented as combined.

(\$ In Thousands)	2019	2018
Net Amount of Budgetary Resources Obligated for Undelivered Orders at the End of the Period	\$ <u>119,845</u>	\$ <u>110,056</u>

Apportionment Categories for New Obligations and Upward Adjustments

The MERHCF reported \$10.5 billion in direct, Category B obligations. Category B obligations are apportioned funds related to a specific project or program.

Permanent Indefinite Appropriations

Public Law 106-398, The Floyd D. Spence NDAA for FY 2001, provided and authorized MERHCF a permanent, indefinite appropriation.

DoD MERHCF Footnotes to the Principal Financial Statements

Legal Arrangements Affecting the Use of Unobligated Balances

The MERHCF's unobligated balances of budget authority represent the portion of special fund receipts collected in the current FY (1) exceeding the amount needed to pay benefits or other valid obligations and (2) exceeding the receipts temporarily precluded from obligation by law. The receipts, however, are assets of MERHCF and are available for obligation as needed in the future.

Explanation of Differences between the SBR and the Budget of the U.S. Government

There was a difference of \$10.5 billion between Appropriations on the Statement of Changes in Net Position (SCNP) and Appropriations on the SBR. The MERHCF records contributions as revenue on the SCNP, while contributions are recorded as Appropriations on the SBR. This is in accordance with Office of Management and Budget reporting requirements. Refer to Note 12, Disclosures Related to the Statement of Changes in Net Position, for additional details.

There are no material differences between amounts reported on the SBR and the SF 133, Report on Budget Execution.

DoD MERHCF Footnotes to the Principal Financial Statements

Note 14. Reconciliation of Net Cost to Net Outlays

Reconciliation of the Net Cost of Operations to Net Outlays

As of September 30	2019		
	Intragovernmental	With the public	Total
Net Cost of Operations (SNC)	\$ (18,315,516)	\$ 44,093,728	\$ 25,778,212
Components of Net Cost That are Not Part of Net Outlays:			
Other	0.00	(7,788)	(7,788)
Increase/(decrease) in assets:			
Account Receivable	65,379	(190)	65,189
(Increase)/decrease in liabilities:			
Accounts payable	14,103	(43,628)	(29,525)
Other Liabilities (Unfunded Leave, Unfunded FECA, Actuarial FECA)	0.00	(37,898,409)	(37,898,409)
Total Components of Net Cost That Are Not Part of Net Outlays	\$ 79,482	\$ (37,950,015)	\$ (37,870,533)
Components of Net Outlays That Are Not Part of Net Cost:			
Other	6,327,396	0.00	6,327,396
Total Components of Net Outlays That Are Not Part of Net Cost	\$ 6,327,396	\$ 0.00	\$ 6,327,396
Net Outlays	\$ (11,908,638)	\$ 6,143,713	\$ (5,764,925)
Agency Outlays, Net, Statement of Budgetary Resources			\$ (5,764,925)
Reconciling Difference			\$ 0.00

In accordance with SFFAS 53, in FY 2019, the initial year of implementation, the disclosure requirements applicable to the prior reporting periods are not required for comparative presentations.

DoD MERHCF Footnotes to the Principal Financial Statements

The Reconciliation of Net Cost to Net Outlays demonstrates the relationship between the MERHCF's Net Cost of Operations, reported on an accrual basis, and Net Outlays, reported on a budgetary basis. While budgetary and financial accounting are complementary, the reconciliation explains the inherent differences in timing and in the types of information between the two during the reporting period. The accrual basis of financial accounting is intended to provide a picture of the MERHCF's operations and financial position, including information about costs arising from the consumption of assets and the incurrence of liabilities. Budgetary accounting reports on the management of resources and the use and receipt of cash by the Department. Outlays are payments to liquidate an obligation, other than the repayment to the Treasury of debt principal.

In FY 2019, Components of Net Cost That are Not Part of Net Outlays includes non-cash charges primarily consisting of \$37.9 billion in changes in Actuarial Health Insurance Liability.

Components of Net Outlays That are Not Part of Net Cost includes \$6.3 billion in receipts that are classified as non-distributed offsetting receipts, therefore are not included in the budgetary reports.

Note 15. Other Disclosures

The actuarial liability for direct care related to Medicare-eligible retiree benefits as of September 30, 2019 and 2018 is approximately \$129.9 billion (23% of total) and \$118.1 billion (22% of total), respectively, which reflects the actuarial present value of the projected direct-care costs of benefits to be provided by MTFs to MERHCF beneficiaries. Additionally, the reported amounts of program revenues and cost for the year ended September 30, 2019, include approximately \$3.3 billion and \$2.3 billion, respectively, and for the year ended September 30, 2018, include approximately \$3.5 billion and \$2.2 billion, respectively, of amounts related to direct care costs. Such MTF-related amounts of direct-care costs are based on cost allocation methods using data extracted from various Service-specific financial, personnel, and workload systems within DoD as well as patient encounter data. With respect to the extracted data, the MTFs do not have OMB Circular A-123 Appendix D, FFMIA compliant, transaction-based accounting systems and cannot report the costs of an individual patient's care.

Other Information

Exhibit 1--Summary of Financial Statement Audit and Management Assurances

SEPTEMBER 30, 2019

Agencies are required to provide certain assurances as to the status and effectiveness of the internal controls and financial management systems that support the preparation of the financial statements. In the context of the MERHCF Management Discussion and Analysis, DoD, and not MERHCF, represents the legislative definition of an Agency. Beginning with FY 2006, as directed in OMB Circular A-123, Management's Responsibility for Internal Control, Appendix A, Internal Control Over Financial Reporting, the 24 CFO Act agencies (includes DoD), are required to provide a separate assessment of the effectiveness of the internal controls over financial reporting as a subset of the overall FMFIA assurance statement. OUSD(C) issued guidelines to the leadership of DoD Components, including MERHCF, as to how to support this DoD reporting requirement. DHA management complied with the required guidelines for MERHCF.

DHA includes auditor identified weakness in its annual assessment of internal controls from the prior year audit. Specifically, the MTFs do not currently have compliant, transaction-based accounting systems that apply common and consistent business rules in a manner envisioned by the DoD's planned Standard Financial Information Structure (SFIS). There is insufficient evidence that adequate controls exist and have been implemented to ensure the completeness, validity, documentation and cut-off of the costs reported. Additionally, there is insufficient evidence that adequate controls exist and have been implemented to ensure the timeliness and accuracy of the medical record coding processes at the MTFs. Further, the healthcare cost data from the MTFs provided for the estimation process are aggregated or derived from information in both financial and non-financial systems within the branches of military services that have not been audited. The MTF-level data is based on budget execution processes, rather than accrual-based accounting. There is insufficient evidence that appropriate and consistent cutoff of accounting activity occurs at the MTF level. The timing of DHA's assessment (dated August, 2019) may cause it to differ from the auditor's reported weakness (dated September, 2019) for the current FY. In its FY 2019 assessments, DHA management can provide reasonable assurance, except for direct care related material weakness, the MERCHF Financial Statement Reporting Entity (FSRE) has effective internal controls to support effective and efficient programmatic operations, reliable financial reporting, and is in process of implementing corrective actions to become fully compliant with applicable laws and regulations (FMFIA § 2). MERHCF FSRE cannot achieve compliance with (FMFIA § 4) for direct care until the Services have implemented financial systems that comply with (FMFIA § 4).

Except for the one direct care-related material weakness as documented in DHA's Annual Statement Required Under the FMFIA, dated September 2019, and the above referenced Service-related FMFIA § 4 weakness, the MERHCF has effective internal controls over financial reporting.

The Status of FY 2019 Audit Findings and Actions Taken tables include a summary of material weakness (FMFIA § 2) and non-conformances (FMFIA § 4), and summary of corrective actions to resolve the material weakness and non-conformances.

ALEXANDRIA, VIRGINIA 22350-1500

November 7, 2019

MEMORANDUM FOR UNDER SECRETARY OF DEFENSE (COMPTROLLER)/CHIEF
FINANCIAL OFFICER, DOD
ASSISTANT SECRETARY OF DEFENSE (HEALTH AFFAIRS)
DIRECTOR, DEFENSE FINANCE AND ACCOUNTING SERVICE

SUBJECT: Transmittal of the Independent Auditor's Reports on the DoD Medicare-Eligible Retiree Health Care Fund Financial Statements and Related Notes for FY 2019 and FY 2018 (Project No. D2019-D000FT-0120.000, Report No. DODIG-2020-008)

We contracted with the independent public accounting firm of Kearney & Company to audit the DoD Medicare-Eligible Retiree Health Care Fund (MERHCF) Financial Statements and related notes as of and for the fiscal years ended September 30, 2019, and 2018. The contract required Kearney & Company to provide a report on internal control over financial reporting and compliance with laws and other matters, and to report on whether the MERHCF's financial management systems did not substantially comply with the requirements of the Federal Financial Management Improvement Act of 1996 (FFMIA). The contract required Kearney & Company to conduct the audit in accordance with generally accepted government auditing standards (GAGAS); Office of Management and Budget audit guidance; and the Government Accountability Office/Council of the Inspectors General on Integrity and Efficiency "Financial Audit Manual," June 2018. Kearney & Company's Independent Auditor's Reports are attached.

Kearney & Company's audit resulted in a qualified opinion. Kearney & Company could not obtain sufficient, appropriate audit evidence to support the costs of direct care provided by DoD-managed military treatment facilities. Kearney & Company concluded that, except for the effects on the financial statements of the amounts related to the MERHCF's direct care costs, the MERHCF FY 2019 and FY 2018 Financial Statements and related notes as of September 30, 2019, and 2018, and for the years then ended, are presented fairly in all material respects, in conformity with generally accepted accounting principles.

DoD Transmittal of Auditor's Opinion

Kearney & Company's separate report, "Independent Auditor's Report on Internal Control Over Financial Reporting," discusses one material weakness related to the MERHCF's internal controls over financial reporting.* Kearney & Company's additional report, "Independent Auditor's Report on Compliance with Laws, Regulations, Contracts, and Grant Agreements," discusses one instance of noncompliance with applicable laws and regulations. Specifically, the Kearney & Company reports describe the following significant matters:

- The health care cost data from the military treatment facilities provided for the direct care cost estimation process are derived from information in both financial and non-financial systems. The military treatment facility-level data are based on budget execution processes and not accrual-based accounting.
- The MERHCF did not comply with the FFMIA because the MERHCF's financial management systems did not substantially comply with the Federal financial management system's requirements, applicable Federal accounting standards, or U.S. Standard General Ledger guidance.

In connection with the contract, we reviewed Kearney & Company's reports and related documentation and discussed them with Kearney & Company's representatives. Our review, as differentiated from an audit of the financial statements in accordance with GAGAS, was not intended to enable us to express, and we do not express, an opinion on the MERHCF FY 2019 and FY 2018 Financial Statements and related notes, conclusions about the effectiveness of internal control over financial reporting, or conclusions on whether the MERHCF's financial systems substantially complied with FFMIA requirements, or on compliance with laws and other matters. Our review disclosed no instances where Kearney & Company did not comply, in all material respects, with GAGAS. Kearney & Company is responsible for the attached reports, dated November 7, 2019, and the conclusions expressed within the reports.

* A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting that results in a reasonable possibility that management will not prevent, or detect and correct, a material misstatement in the financial statements in a timely manner.

DoD Transmittal of Auditor's Opinion

We appreciate the cooperation and assistance received during the audit. Please direct questions to me.

INDEPENDENT AUDITOR'S REPORT

To the Assistant Secretary of Defense for Health Affairs and the Inspector General of the Department of Defense

Report on the Financial Statements

We have audited the accompanying financial statements of the Medicare-Eligible Retiree Health Care Fund (MERHCF), which comprise the balance sheets as of September 30, 2019 and 2018, the related statements of net cost and changes in net position, and the combined statements of budgetary resources (hereinafter referred to as the "financial statements") for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget (OMB) Bulletin No. 19-03, *Audit Requirements for Federal Financial Statements*. Those standards and OMB Bulletin No. 19-03 require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion.

Basis for Qualified Opinion

We were unable to obtain sufficient, appropriate evidential matter to support the costs of direct care provided by the Department of Defense (DoD)-managed Military Treatment Facilities (MTF). As discussed in Note 15 to the financial statements, the actuarial liability for Medicare-eligible retiree benefits as of September 30, 2019 and 2018, includes approximately \$129.9 billion (23% of total) and \$118.1 billion (22% of total), respectively, of amounts reflecting the actuarial present value of the projected direct care costs of benefits to be provided by the MTFs to eligible participants in the MERHCF. Additionally, the reported amounts of program revenues and cost, for the year ended September 30, 2019, include approximately \$3.3 billion and \$2.3 billion, respectively, and, for the year ended September 30, 2018, include approximately \$3.5 billion and \$2.2 billion, respectively, of amounts related to the direct care costs.

The MERHCF recognizes expenses based on quarterly prospective payments made to support the operations of MTFs. The prospective payments for direct care are fixed based on estimated costs for the anticipated number of patients that will use an MTF to receive health care. The MTF-level data is based on budget execution processes rather than accrual-based accounting. While activity-based costing techniques are used to estimate program costs related to the MTFs, the costs being allocated cannot be related to specific appropriations. There is also insufficient evidence that appropriate and consistent cut-off accounting activity occurs at the MTF level associated with care provided to MERHCF beneficiaries. We were unable to obtain sufficient evidence as to the direct care component of the reported amounts in the accompanying financial statements for Medicare-eligible retiree beneficiaries by performing other audit procedures. Consequently, we were unable to determine whether any adjustments to these amounts were necessary.

Qualified Opinion

In our opinion, except for the effects of the matter described in the Basis for Qualified Opinion section above, the financial statements referred to above present fairly, in all material respects, the financial position of the MERHCF as of September 30, 2019 and 2018, and its net cost of operations, changes in net position, and budgetary resources for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that Management's Discussion and Analysis (hereinafter referred to as the "required supplementary information") be presented to supplement the financial statements. Such information, although

not a part of the financial statements, is required by OMB and the Federal Accounting Standards Advisory Board (FASAB), who consider it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing it for consistency with management's responses to our inquiries, the financial statements, and other knowledge we obtained during our audits of the financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audits were conducted for the purpose of forming an opinion on the financial statements taken as a whole. Other Information, as named in the Agency Financial Report (AFR), is presented for purposes of additional analysis and is not a required part of the financial statements. Such information has not been subjected to the auditing procedures applied in the audits of the financial statements; accordingly, we do not express an opinion or provide any assurance on it.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards* and OMB Bulletin No. 19-03, we have also issued reports, dated November 7, 2019, on our consideration of the MERHCF's internal control over financial reporting and on our tests of the MERHCF's compliance with provisions of applicable laws, regulations, contracts, and grant agreements, and other matters for the year ended September 30, 2019. The purpose of those reports is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance and other matters. Those reports are an integral part of an audit performed in accordance with *Government Auditing Standards* and OMB Bulletin No. 19-03 and should be considered in assessing the results of our audits.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

To the Assistant Secretary of Defense for Health Affairs and Inspector General of the Department of Defense

We have audited, in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget (OMB) Bulletin No. 19-03, *Audit Requirements for Federal Financial Statements*, the financial statements of the Medicare-Eligible Retiree Health Care Fund (MERHCF) as of and for the year ended September 30, 2019, and the related notes to the financial statements, which collectively comprise the MERHCF's financial statements, and we have issued our report thereon dated November 7, 2019.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the MERHCF's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the MERHCF's internal control. Accordingly, we do not express an opinion on the effectiveness of the MERHCF's internal control. We limited our internal control testing to those controls necessary to achieve the objectives described in OMB Bulletin No. 19-03. We did not test all internal controls relevant to operating objectives as broadly defined by the Federal Managers' Financial Integrity Act of 1982 (FMFIA), such as those controls relevant to ensuring efficient operations.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies; therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as described in the accompanying Schedule of Findings, we identified certain deficiencies in internal control that we consider to be a material weakness and significant deficiency.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. We consider the deficiency described in the accompanying Schedule of Findings to be a material weakness.

A significant deficiency is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiency described in the accompanying Schedule of Findings to be a significant deficiency.

We noted certain additional matters involving internal control over financial reporting that we will report to the MERHCF's management in a separate letter.

The MERHCF's Response to Findings

The MERHCF's response to the findings identified in our audit is described in the Management's Discussion & Analysis (MD&A) of the Agency Financial Report (AFR). The MERHCF's response was not subjected to the auditing procedures applied in the audit of the financial statements; accordingly, we do not express an opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and the results of that testing, and not to provide an opinion on the effectiveness of the MERHCF's internal control. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* and OMB Bulletin No. 19-03 in considering the entity's internal control. Accordingly, this communication is not suitable for any other purpose.

A handwritten signature in blue ink that reads "Kearney & Company". The signature is written in a cursive, flowing style.

Alexandria, Virginia
November 7, 2019

Schedule of Findings

Material Weakness

I. Military Treatment Facility (MTF) – Direct Care Costs Data Accumulation (*Repeat Condition*)

Background: The costs of health care services provided directly by the Department of Defense (DoD) in Military Treatment Facilities (MTF) (i.e., direct care costs) for the Medicare-Eligible Retiree Health Care Fund (MERHCF) beneficiaries represent significant input to the development of the actuarially determined health care liabilities of the MERHCF, as well as the determination of amounts contributed to the MERHCF by the branches of military service for active duty participants. In addition, the MERHCF recognizes expenses based on quarterly prospective payments made to the Defense Health Program (DHP) Service Medical Activity (SMA) components to support the operations of the MTFs on an ongoing basis as a result of care provided to MERHCF beneficiaries.

Direct care costs are incurred by the multitude of the MTFs managed by the SMA components in various locations. The prospective payments for direct care are fixed based on estimated costs for the anticipated number of patients who will rely on an MTF to receive health care. The anticipated number of patients is based on the actual workload two years prior to the budget execution year. The MERHCF is responsible for developing policies and procedures which validate estimated costs against actual costs.

Condition: The MERHCF fiscal year (FY) 2019 quarterly prospective payments included \$1.7 billion in expenses for direct care costs. Health care cost data from the MTFs provided for the direct care cost estimation process used in the prospective payment is aggregated or derived from information in both financial and non-financial systems within the DHP SMAs. The MTF-level data is based on budget execution processes rather than accrual-based accounting. While activity-based costing techniques are used to estimate program costs related to the MTFs, the costs being allocated cannot be related to specific appropriations.

In addition, the MERHCF does not have a formalized process in place to track health care encounters for MERHCF beneficiaries for accounting purposes, resulting in no transactional patient-level data to support the direct care costs recognized by the MERHCF. The MERHCF prospective payments are made to SMAs in advance of health care provided. The MERHCF, however, recognizes the payments as expenses upon the transfer of funds, which is not in compliance with Federal accounting standards.

There is also insufficient evidence that appropriate and consistent cut-off accounting activity occurs at the MTF level associated with care provided to MERHCF beneficiaries. The MERHCF had not yet implemented appropriate and sufficient levels of management control and reconciliation processes to ensure the adequacy and completeness of the data required for its financial reporting and actuarial valuation processes associated with direct care. Additionally, the MERHCF performs annual retrospective reconciliation reviews of the MTF patient workload

data for purposes of comparing the two-year historical data used in the prospective payment development to the actual patient workload realized in the year of payment. The reconciliations are performed in the following FY after all payments have been made, and the results of the reconciliations are used for the purpose of determining if any significant transfer of funds should be returned to the MERHCF, as well as to adjust the prospective payment methodology, as may be warranted.

Finally, there is insufficient evidence that effective controls exist and have been implemented to ensure the timeliness and accuracy of the medical record coding processes at the MTFs, which is a significant factor in the allocation process for assigning costs to MTFs.

Cause: MTFs are not currently performing patient-level accounting for MERHCF beneficiaries, and MTF health care encounters for MERHCF beneficiaries are not tracked for billing purposes. The SMAs have not established an effective business process with associated internal controls to properly recognize revenue based on care provided from actual activity occurring in the current FY. Rather, the cost of direct care provided to MERHCF beneficiaries for FY 2019, with the exception of the pharmacy ingredient cost, is fixed based on estimated costs for the anticipated number of MERHCF beneficiaries that will rely on an MTF to receive health care. The anticipated number of patients is based on the actual workload two years prior to the budget execution year, and the annual reconciliation process of the two-year look-back is not performed timely to record adjustments which may be deemed necessary.

Effect: Kearney & Company, P.C. (Kearney) was unable to determine the effect for this finding, as the MTF-level data is based on budget execution processes rather than accrual-based accounting. There is insufficient evidence supporting the completeness, validity, and appropriateness and consistent cut-off of accounting activity occurring at the MTF level associated with health care provided to MERHCF beneficiaries.

The lack of effective business processes and associated internal controls for the accounting treatment of medical services at SMA-managed MTFs has resulted in noncompliance with Federal accounting standards and, accordingly, the Federal Financial Management Improvement Act of 1996 (FFMIA). The MERHCF financial statements may contain misstatements associated with Military Retirement and Other Federal Employment Benefits, Accounts Payable and Advances to Others on the Balance Sheet, as well as the Revenue and Expense lines on the Statement of Net Cost.

Recommendations: Kearney recommends that the MERHCF implement the necessary management control and reconciliation processes to support direct care costs with actual patient workload data from the current FY, as well as continue the design of improved financial management information systems as part of the overall DoD business transformation efforts.

Specifically, Kearney recommends that the MERHCF:

1. Formalize expenditure recognition procedures to be aligned with actual care provided in the current FY, as applicable for care provided by each SMA. Expenses recognized should be supported by transactional activity recorded in the general ledger (GL) system or in a supporting subsidiary system.
 - a. Prospective payments disbursed should be recorded as advances in accordance with United States Standard General Ledger (USSGL) guidance from Treasury. Reference should be made to the recommended accounting treatment issued by the Defense Audit Remediation Working Group (DARWG) Research and Recommendation Paper, *MERHCF Transfer of Budgetary Resources to DHP*. Distribution payments made in excess of billings during the FY should be reflected as an asset of the MERHCF at year-end.
 - b. Patient care received by MERHCF beneficiaries should be tracked and monitored for expense recognition purposes using available information systems, as appropriate (e.g., Composite Health Care System [CHCS], Armed Forces Billing And Collection Utilization Solution [ABACUS], Military Health System [MHS] Data Repository [MDR]). Actual execution in the current FY should be analyzed against the prospective payments throughout the FY to validate that the two-year historical look-back is appropriate for financial reporting (i.e., appropriate expense recognition and periodic drawdown of advances). This supporting prospective payment analysis should be performed quarterly and provided to the appropriate accounting personnel for consideration of adjusting accounting entries, as necessary.
 - c. Patient care encounters used in the quarterly prospective payment analysis should be maintained for audit trail purposes. Completeness of the patient care encounter data used in the quarterly analysis should be verified and documented.
 - d. Prospective payments provided in excess of actual care received should be recognized as an asset at year-end.
2. Through coordination with the DHP SMAs, develop a Memorandum of Understanding (MOU) for care provided to MERHCF beneficiaries at MTFs in support of the prospective payment validation discussed above. The MOU should establish necessary data and/or support requirements from the SMAs for MERHCF accounting personnel to be able to perform the required quarterly validation for the prospective payments.

Significant Deficiency

II. Information Systems (*New Condition*)

Background: The MERHCF operates in a complex information system environment to execute its mission and record transactions timely and accurately. The MERHCF operates or relies on external providers for administration of multiple key financial management systems, including two core accounting systems and multiple financial support systems. The Defense Manpower Data Center (DMDC) Core (dCore), Defense Enrollment Eligibility Reporting System (DEERS), Naval Postgraduate System (NPS) Mainframe, and PCOS systems support key medical benefit payment activities. dCore, DEERS and NPS Mainframe systems are administrated by a service organization. The PCOS system is administrated by the Defense Health Agency (DHA).

Because of the sensitive nature of the MERHCF's information system environment, Kearney does not present specific details related to the systems, conditions, or criteria discussed within this significant deficiency. We provided those details separately to MERHCF management and relevant stakeholders through Notices of Findings and Recommendations (NFR).

Condition: The MERHCF, through the support systems of its service organization and DHA, has several deficiencies in the design and operating effectiveness of internal controls related to key financial support systems and service organization systems. While no single control deficiency meets the level of a significant deficiency, in combination, these deficiencies elevate to a significant deficiency due to the pervasiveness of the weaknesses throughout the information system environment, the MERHCF's reliance on these systems for financial reporting, and the nature of the deficiencies repeating from the prior year.

Our testing disclosed deficiencies in the following areas:

- Security Management
 - System Security Plans (SSP) for select key financial management systems did not include documentation of data types within the system to support security categorizations, as required by the National Institute of Standards and Technology (NIST) Risk Management Framework (RMF) to establish a NIST Special Publication (SP) 800-53, Revision (Rev.) 4-compliant baseline of security controls
 - Inconsistent implementation of policies and procedures for ensuring complete and update-to-date Plans of Action and Milestones (POA&M) for all key financial management systems
- Access Controls and Segregation of Duties
 - Incomplete or not fully implemented policies and procedures for managing and monitoring access to select key financial management applications and databases, including third-party systems
 - Incomplete or not fully implemented policies and procedures for the proper segregation of duties, including documented business justifications for existing segregation of duties conflicts, for key financial management applications

- Inconsistent implementation of user account recertification to verify the propriety of access to key financial management systems
- Inconsistent logging and monitoring of activity for key financial management systems
- Lack of strong password configurations for a key financial management system
- Configuration Management
 - Incomplete, inconsistent, or unmaintained documentation of configuration changes for a key financial management application, including an incomplete listing of changes implemented into the production environment.

Cause: The deficiencies are a result of multiple circumstances, including previous deferral of key information system environment improvement projects related to audit logging, lack of integration between business and information technology (IT) stakeholders, incomplete or inconsistent implementation of policies and procedures, and ineffective quality control processes to ensure personnel responsible for key information system controls followed documented procedures.

Effect: Without effective controls throughout the information system environment, the risk of unauthorized access and information system changes increases, thereby increasing the risk to the systems and the data confidentiality, integrity, and availability.

Recommendations: Kearney recommends that the MERHCF:

1. Continue to perform information system environment improvement projects related to audit logging.
2. Complete integrated business and IT stakeholder review of business data flow through systems and similarly perform related identification of incompatible duties that require segregation.
3. Develop, update, and implement policies and procedures addressing the security controls required by NIST SP 800-53, Rev. 4.
4. Develop and implement a quality control review over the user authorization and user access review processes, to include procedures to ensure the completeness and accuracy of the access request forms and access listings reviewed.
5. Update and implement configuration management procedures to include quality control reviews. These reviews should ensure that all changes follow a defined and controlled process, including maintaining appropriate supporting documentation from initial change request through implementation into the production environment.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE WITH LAWS, REGULATIONS, CONTRACTS, AND GRANT AGREEMENTS

To the Assistant Secretary of Defense for Health Affairs and the Inspector General of the Department of Defense

We have audited, in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget (OMB) Bulletin No. 19-03, *Audit Requirements for Federal Financial Statements*, the financial statements of the Medicare-Eligible Retiree Health Care Fund (MERHCF) as of and for the year ended September 30, 2019, and the related notes to the financial statements, which collectively comprise the MERHCF's financial statements, and we have issued our report thereon dated November 7, 2019.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the MERHCF's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of applicable laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts, as well as provisions referred to in Section 803(a) of the Federal Financial Management Improvement Act of 1996 (FFMIA). We limited our tests of compliance to these provisions and did not test compliance with all laws, regulations, contracts, and grant agreements applicable to the MERHCF. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests, exclusive of those referred to in the FFMIA, disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards* and OMB Bulletin No. 19-03.

The results of our tests of compliance with FFMIA disclosed that the MERHCF's financial management systems did not comply substantially with the Federal financial management systems requirements, applicable Federal accounting standards, or application of the United States Standard General Ledger at the transaction level, as described in the accompanying Schedule of Findings.

The MERHCF's Response to Findings

The MERHCF's response to the findings identified in our audit is described in Management's Discussion and Analysis (MD&A) of the Agency Financial Report (AFR). The MERHCF's response was not subjected to the auditing procedures applied in our audit of the financial statements; accordingly, we do not express an opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* and OMB Bulletin No. 19-03 in considering the entity's compliance. Accordingly, this communication is not suitable for any other purpose.

Schedule of Findings

Noncompliance and Other Matters

I. FFMIA Noncompliance (*Repeat Condition*)

The Federal Financial Management Improvement Act of 1996 (FFMIA) requires that an entity's overall financial management systems environment operate, process, and report data in a meaningful manner to support business decisions. Compliance with FFMIA is achieved through substantial compliance with the following three Section 803(a) requirements:

- Federal financial management system requirements
- Applicable Federal accounting standards
- United States Standard General Ledger (USSGL) at the transaction level.

The effects of the material weakness reported in the accompanying *Report on Internal Control over Financial Reporting*, with respect to direct care cost data accumulation, indicate substantial noncompliance with the requirements of Section 803(a) of FFMIA.

Federal Financial Management Systems Requirements

FFMIA requires reliable financial reporting, including the availability of timely and accurate financial information, and maintaining internal control over financial reporting and financial system security. The matters described in the Basis for Qualified Opinion section in the accompanying *Independent Auditor's Report*, and the material weakness reported in the accompanying *Report on Internal Control over Financial Reporting*, represent noncompliance with the requirement for reliable financial reporting, with respect to direct care costs.

Federal Accounting Standards

With respect to direct care costs, the Medicare-Eligible Retiree Health Care Fund (MERHCF) is not in compliance with the requirements necessary to meet internal and external reporting mandates. This includes the requirement that agency management systems maintain data to support reporting in accordance with Generally Accepted Accounting Principles (GAAP) for financial statements to be prepared in accordance with the form and content rules prescribed by the Office of Management and Budget (OMB) and reporting requirements prescribed by the Department of the Treasury (Treasury).

The financial management systems utilized by the MERHCF, with respect to direct care costs, do not fully, efficiently, and effectively support the MERHCF's efforts to:

- Consistently, completely, and accurately record and account for Federal revenues, expenditures, and costs
- Provide timely and reliable Federal financial management information of appropriate form and content

- Execute all of the above in a way that is consistent with Federal accounting standards and the USSGL.

USSGL at the Transaction Level

While the general ledger system utilized by the MERHCF is compliant with the USSGL with respect to direct care costs, it is not transaction-based.

Recommendations: Kearney & Company, P.C. (Kearney) has provided detailed recommendations in our *Report on Internal Control over Financial Reporting* as it pertains to direct care cost data accumulation.
